SEARS, ROEBUCK *and* CO.

SEARS NOW OFFER

Anything and Everything

ON EASY PAYMENTS

(on orders of \$10 or more)

Whatever you need—shoes, clothing, housewares—rugs, furniture, tires—anything and everything from this or any other Sears catalog may be purchased on Sears Easy Payment Plan. Your order need total only \$10 or more.

No need to wait. You don't need the ready cash—you can get and enjoy, right now, the merchandise you want—and pay for it while you use it. Just a small down payment and a little each month will buy anything Sears sell. Sears Easy Payment Plan permits you to buy goods of better quality, because large immediate cash expenditures are unnecessary.

Sears Easy Terms are low and, besides, your regular monthly payment buys more at Sears. Notice in the table of terms the different amounts that can be purchased with the same monthly payment. After making out your order you will find, in most cases, that you can add several additional items without increasing your monthly payments.

ANSWERS TO YOUR QUESTIONS

1. *Who may purchase on the Easy Payment Plan?* Any responsible person with a regular income can very easily establish his credit at Sears. (Persons under legal age should have parent or guardian sign the application.)
2. *What may be purchased?* Everything Sears sell may be purchased on Easy Terms in orders of \$10 or more for as little as \$2 monthly.
3. *How much may be purchased?* That depends on how much you can conveniently pay each month. The "Amount Payable Monthly" column, in the Table of Terms to the right, will show you how much you can buy with any given monthly payment. For example, for \$2 monthly you can buy up to \$17; and for \$5 monthly you can buy up to \$57.50.
4. *How is an order placed?* Simply list the items you wish to buy on one of our order blanks. Several are found in the back of this catalog. Refer to the Table of Terms for the deposit to send with your order and amount payable monthly. Answer the simple questions on the back of the order blank, sign the application, enclose the deposit you wish to send, and mail to us.
5. *Why is there a carrying charge?* The carrying charge is to defray the cost of opening the account, keeping books, interest, handling payments, etc. No matter where you buy on credit, you pay for these expenses. In some stores the extra cost of credit is concealed in the selling price. At Sears, there are no HIDDEN charges. We tell you exactly what the charge for credit is, by showing it in the table to the right.
6. *When is the first payment due?* Monthly payments begin thirty days after you receive your order. In this way you use the merchandise while you pay for it—and almost before you know it, your account will be all paid. If you wish, you may pay the balance sooner than the time allowed and an adjustment of carrying charge will be made.
7. *Can payments be made at Sears Retail Stores?* Yes. You may make your payments personally at any of our Retail Stores or mail them direct to our Mail Order Store, whichever you prefer.
8. *Can additional purchases be made later on?* Yes. After you have made regular payments on your account, you will be notified that additional purchases of \$5 or more may be made and added to the same account without sending a deposit with the order and in most instances without increasing the monthly payments.

Bundle

NEW "STREAMLINE" SHINGLES

- Made of high quality felt, pure asphalt saturant and coating, "STA-SO" NO-FADE, slate granule surfacing and in the most modern roofing factories. No mineral filler is used in Sears Asphalt coating to add useless weight.
- "Streamline's" V-shaped slots provide quicker drainage; they are self-aligning and self-spacing.
- Wavy-line design gives your roof a "thatched" effect. Remember—3-inch headlap; the utmost in protection.
- Guaranteed 17 years; bears Underwriters' Label; fire-resistant—reduces insurance as much as 12% in some localities as compared with wood shingles. Color of slate granules shown on Page 1059.

As fresh and welcome as a breath of spring are these new Streamline Shingles with their wavy design and charming colors. Gives a "thatched" effect both picturesque and pleasing—makes your roof "different" from your neighbors'. Not expensive, and easy to buy on Sears Easy Payments. In fact, as little as \$6 a month buys enough shingles for the average 5-room home. See Page 5. Shingles are 11½x36 in., providing 3-in. headlap. Each bundle covers 33½ sq. ft. and weighs 79 lbs.

We furnish instruction for laying. For amount of nails required, see below. See "How to Order" on Page 1009. Shipped from warehouse in Chicago, Detroit, Cincinnati, Minneapolis, Buffalo, Philadelphia, Kearny, N. J. or Boston. Order from your Mail Order House.

HEXAGON STRIP SHINGLES

- Same fine construction as Streamline Shingles at left—same 17-year guarantee; choice of 6 enduring colors—see colors on Page 1059.
- Even though we put only the best and purest ingredients into Hexo Shingles, you still make a saving at Sears prices. No big investment required. You can re-roof on EASY PAYMENTS—see details on Page 5. We recommend the 12x36-in. shingle because it gives double coverage over the entire roof and a 4-in. headlap. We recommend a layer of Asphalt Saturated Felt. 48 LM3009 (See Page 1010) under the 11½x36-in. size shingle for new roofs. Shipped from warehouse in Chicago, Detroit, Cincinnati, Buffalo, Minneapolis, Philadelphia, Kearny, N. J. or Boston, whichever is nearest you. Order from your Mail Order House.

STANDARD SIZE

Size, 11½x36 inches. Provides a 2-inch headlap. Approx. shpg. wt., 84 lbs. per bundle of 50 sq. ft. Two bundles cover 100 sq. ft. Laying instructions in each bundle.

COATED WITH 100% PURE ASPHALT . . NO "FILLERS" USED TO LOWER COST

No "Mineral" Dust in Sears Shingles!

Sears take particular pride in offering Asphalt Shingles made of only purest ingredients. Most manufacturers of slate surfaced shingles (Sears excepted) "load" their asphalt coatings with mineral matter such as slate dust or finely ground mica. Such adulteration, in fact, is common practice in the roofing industry. Needless to say, this mineral matter in the coating adds nothing to the life or value of the shingles. It is done only for the purpose of keeping down the manufacturing cost and adding a fictitious weight.

Sears Asphalts Not Adulterated in any Way

Sears keep faith with their millions of customers by refusing to tolerate this practice. The asphalt we use in our coatings is 100% pure—and will remain so. Our coatings will stand up under the most rigorous weather conditions. It costs Sears nearly \$100,000 a year extra to make our coatings of pure asphalt, but we feel that our customers are entitled to this quality safeguard. We value the good will of our customers above any temporary profits. When buying shingles, do not be influenced by weight alone—it has little bearing on actual lasting and wearing quality. Demand shingles made of 100% pure asphalt.

70% Asphalt

Above we show relative amount of pure asphalt in Sears asphalt coatings (at right) as compared with filled asphalt coatings used by others (at left). Sears use only 100% pure asphalt—no fillers, adulterants or substitutions; many other coatings contain only 70% asphalt, the balance being slate dust or fine mica to add a fictitious weight and lower the cost. Sears Shingles meet the rigid specifications of the U. S. Bureau of Standards, Underwriters' Laboratories, American Society for Testing Materials, Sears own great Testing Laboratories, and most important, the test of service on hundreds of thousands of homes in all sections of the country.

Here's
Proof
of
Quality

100% Asphalt

"STA-SO" No-Fade Slate Granules

"STA-SO," the non-porous, non-fading slate surfacing granules used on all Sears shingles and slate roofing, defies time and the elements—insuring your roof against the destructive action of age, weather, sun and fire. These granules give the roofing surface permanence. Their durability is proved by generations of use. The colors are baked in and will not wash off, as is the case with some roofings made with cheaper granules. STA-SO, the eternal hard slate surfacing is not exceeded by any other for color fastness.

SEARS NEW 6-POINT ROOFING SERVICE

ONLY SEARS GIVE YOU ALL THESE NECESSARY HELPS

Perhaps you have put off buying a new roof because you have felt that freight charges were high; or that it was difficult to apply; or that the cost was beyond your means. These and other doubts have been dispelled by Sears New 6-Point Roofing Service announced here for the first time. Read it carefully. Only Sears offer a service so complete. It makes roofing easy for you to order, easy to receive and easy to apply. It has real money value—take advantage of it!

SAMPLES ON REQUEST

We'll be glad to send you an actual sample of any of our asphalt roofings. In this way you may actually KNOW how good is Sears quality—see how colorful the slate granules—note thickness and flexibility, etc.

We can furnish samples of Oriental Shingles and Slate Rolls as well as Best-of-All and Rival Roofing.

SIMPLE INSTRUCTIONS

With each order of asphalt roofing we include simple, easy-to-follow instructions for laying your roofing, whether over roof boards on new construction or over old roofing. These instructions outline every step of the work and enable you to do the job in an expert manner. Only a few simple tools needed.

A WAREHOUSE NEAR YOU

Instead of only one or two shipping points, Sears ship from many convenient warehouses to save you freight—and give quick service. This service has definite money value to you. Here are the low freight rates per 100 lbs. on asphalt roofing: Miles and Rate... 100, 35c 200, 48c 300, 59c 400, 72c

TOOL LOAN SERVICE

Sears will loan ladders, jacks and ladder hooks to help you lay your roofing. You deposit the cost of the equipment. When it is returned, your deposit is refunded. You actually pay only the freight costs both ways. Send list of items needed to Sears, Roebuck and Co., Dept. 63.

ROOFING KNIFE INCLUDED

Included at no extra charge with every order for asphalt roll roofing or shingles is a curved knife made especially for roofing purposes. This knife has strong steel blade with wood handle and will be of real purpose in enabling you to lay your roof in an expert manner. You'll find it useful for other purposes, too.

FREE ESTIMATE

We'll be glad to give you a free estimate on roofing for home, barn or any building. This estimate will include all transportation costs delivered to your station. We can also estimate on your insulation, guttering or steel roofing needs. Simply write for Estimate Blank No. 6089 L.

"3-IN-1" STRIP SHINGLES

- First quality Jumbo weight felt, heavily asphalt saturated and coated. Contains no mineral "filler" to add useless weight.
- Guaranteed for 17 years of satisfactory service.
- Nature's own colors, sealed in overlasting "STA-SO" slate.
- Fire-resisting; approved by Underwriters' Laboratories, Inc.

This new "3-in-1" Jumbo Weight Strip Shingle is made to the same fine specifications as our other shingles on this page, the difference being in weight of felt and style of shingle. The Jumbo Heavy Weight felt makes a thick, heavy shingle—a shingle much heavier and superior to the "Thick-Butt" Shingle and because there are only 3 tabs in a 36-in. strip, the exposed portion of the shingles has a large and more massive appearance on the roof. Offered in three colors—a manufacturing economy which permits us to offer this quality shingle at the low price indicated. Remember this—our "3-in-1" Shingles weigh 235 pounds per square.

MASSIVE "JUMBO" SIZE AND WEIGHT

Size of each strip, 12x36 in.; headlap, 2 in. Weight, 78 lbs. per bundle. 3 bundles cover one "square" (100 square feet) of roof surface. Shipped from factory in Chicago, Detroit, Cincinnati, Philadelphia or Kearny, N. J., whichever is nearest. Order from your Mail Order House.

Catalog No.	Color	Per 33 1/2 Sq. Ft. Bdl.
48 LM 2990	Tile Red	\$158
48 LM 2991	Jade Green	
48 LM 2992	Blue-Black	

EASY PAYMENTS
Don't wait! Buy roofing NOW, on Sears Easy Payments. See Page 5; also Page 989 for information on F.H.A. financing.

\$195
Per
33 1/2 Sq. Ft.
Bundle

"4-IN-1" STRIP SHINGLES

- First quality felt, thoroughly asphalt-saturated, then coated on both sides with pure asphalt (no mineral filler used.)—Resists fire; reduces insurance rates up to 12% in some localities as compared with wood shingles.
- Guaranteed for 17 years of satisfactory service.
- Choice of 6 colors, sealed in lasting "STA-SO" slate

Quality for quality here is a value which you cannot equal anywhere. These shingles will not crack or dry up and will remain flat. They look like individual shingles, but are laid 4 times as fast. We recommend 12 1/2-in. size because of 4 1/2-in. headlap and "double coverage." Shipped from Chicago, Detroit, Cincinnati, Minneapolis, Buffalo, Philadelphia, Boston or Kearny, N. J. Order from your Mail Order House.

STANDARD SIZE—10x36 inches. Provides a 2-inch headlap. Shipping weight, 105 lbs., 50 sq. ft. to the bundle. Two bundles cover 100 sq. ft.

INDIVIDUAL SLATE-SURFACED SHINGLES

The "Standard Size" shingle is made of exactly the same materials as the other shingles on these pages. The Jumbo is the heaviest and best asphalt shingle you can buy, regardless of price. It is the largest size that can be satisfactorily fastened with only two nails. Leaves a pleasing deep shadow line on account of its thickness.

We recommend Jumbo size because they are made on heavier felt and being larger can be laid quicker. Both sizes guaranteed for 17 years. Choice of three non-fading colors. Order by catalog number.

STANDARD SIZE is 9x12 inches. Lays 4 inches to weather. 1 bundle covers 25 square feet. Shipping weight, per bundle, 63 pounds.

JUMBO SIZE is 12x16 inches. Lays 5 inches to weather. 1 bundle covers 25 square feet. Shipping weight, per bundle, 81 pounds.

17 YEARS GUARANTEED SERVICE... YOU CAN BUY ON EASY TERMS... SEE PAGE 5

95 LB. ROLL "ORIENTAL" ROLL ROOFING \$1.90
And Up Per Roll

- Guaranteed 17 years.
- Made of finest felt and asphalt and covered with genuine "STA-SO" slate granules.
- Fire-resisting; approved as Standard by Underwriters' Laboratories, Inc.

Postponing a new roof "until you can afford it"? Well, you can have it NOW—a roof of finest quality; resplendent with vivid color; and bearing an ironclad 17-year guarantee. Sears Easy Payment Plan (described on Page 5) brings it to you for only a small down payment. And at no extra charge—Sears give you an extra inch of lap protection (3 inches instead of 2); 5 pounds more weight per roll (95 pounds instead of 90) and 3 extra square feet of material. Need an estimate? We'll give you one free. A roofing knife? One is included with your order—no extra charge. Easy to lay? Yes—we tell you how. Is freight high? No—one of our big warehouses is near you.

When you buy roofing from Sears, there are no doubts—no delays—no trouble—no regrets. And the actual cash saving is considerable!

Choice of Colors—Nails Included

Oriental 95-lb. Roofing comes in choice of 3 bright, lasting colors—see them opposite Page 1058. Equally suitable for old or new roofs with pitch of 1½ inches or more per running foot. Rolls are 36 inches wide, 37 feet long, contain 111 square feet of material and actually cover 100 square feet of roof surface with allowance for 3-inch lap. Roll contains more than the usual amount of large head galvanized roofing nails and lap cement, also a roofing knife and instructions for laying. Order roofing with 1½-inch nails for laying over old roofing. Shpg. wt., per roll, 95 lbs. Shipped from warehouse in Chicago, Detroit, Cincinnati, Minneapolis, Buffalo, Philadelphia, Kearny, N. J. or Boston, whichever is nearest you. Order from your Mail Order House.

REMEMBER SEARS "6-POINT" ROOFING SERVICE

Sears new "6-Point" Roofing Service solves your roofing problems. Gives you a detailed estimate in advance. Provides you with convenient shipping points and lowest freight rates. A sample piece of roofing in advance, if you wish, so you can judge the quality. A roofing knife with your order at no extra cost. The loan of tools if you need them. Sears have attained leadership by giving a COMPLETE SERVICE—read all about it on PAGE 1007.

A SEARS WAREHOUSE Near You. All slate roll roofing on these pages, unless otherwise specified, shipped from warehouse in Chicago, Detroit, Cincinnati,

Minneapolis or Buffalo. We ship from the one nearest you, thus keeping down your freight costs. Only Sears have this complete warehouse service. Freight rates are low. The table below shows the rate per 100 pounds on asphalt roofing.

Miles...	100	200	300	400
Rate....	35c	48c	59c	72c

Suppose you live 100 miles from one of our shipping points and you order 10 rolls of "Oriental", 90-lb. slate roofing, total weight, 900 lbs. The rate would be 9 times 35c or only \$3.15, total freight on your order.

"STAGGERED EDGE" ASPHALT ROOFING

- Guaranteed to give satisfactory service.
- Made of same high quality materials and same thickness as roofing at top of page. Recommended only for application over old roofs of ½ pitch or more.
- Surfaced with genuine "STA-SO" slate granules.

"Staggered Edge" Roofing has the popular black tip, producing a two-toned shingle effect. Rolls are 36 inches wide and cut down the center to form the staggered edge effect. Made of the same fine quality materials as used in our other roofings—"STA-SO" slate granules, 100% pure asphalt coating, etc. Roll contains enough material to cover 100 sq. ft. of roof surface allowing for the usual 2-inch

lap. Nails should be ordered (see listing below). Use on roofs with ½ pitch or more. Shipped from Chicago, Detroit, Cincinnati, Minneapolis, Buffalo, Philadelphia, Kearny, N. J. or Boston. Order from your Mail Order House.

Catalog No.	Color	Shpg. Wt.	Per Roll
48 LM 1345	Tile Red	105 lbs.	\$2.05

48 LM 1347	Blue Black	105 lbs.	

48 L 2976—1½-inch Nails. Enough to lay one roll. Shpg. wt., 2 lbs. 16c

100% PURE ASPHALT COATING NO "FILLERS"

Asphalt roofings may look alike and weigh the same but even a roofing expert cannot detect the difference unless he resorts to chemical analysis. Take "loading" for instance. This is a common practice in the roofing industry—the addition of slate dust or finely ground mica to the asphalt coating in order to keep down the cost and add a fictitious weight to the roofing. In most cases of adulteration, the filler used by other manufacturers amounts to 30% of the weight of the coating.

Sears keep faith with their millions of customers by refusing to tolerate this practice. The asphalt we use in our coatings is 100% pure—and will remain so. At right we show the relative amount of pure asphalt in Sears roof coatings (above) as compared with asphalt and "filler" used by others (below). Insist on roofings that are coated with 100% pure asphalt!

"DIAMOND POINT" ASPHALT ROLL ROOFING

- Guaranteed to give satisfactory service.
- Made of same high quality materials and same thickness as roofing at top of page. Recommended only for application over old roofs of ½ pitch or more.
- Surfaced with genuine "STA-SO" slate granules.

Thousands of home owners prefer the Diamond Point design roofing because it relieves the severity of straight lines. Sears offer this popular style of "STA-SO" slate-surfaced asphalt roofing at an attractive low price and in choice of three strikingly beautiful colors. Rolls are 36 inches wide, but are cut in diamond shape down the center, and contain enough material to cover 100 square feet of roof surface allowing for 2-inch lap. Two pounds of nails (priced below) needed to lay each roll. No lap cement is needed. Approximate shipping weight, per roll, 105 pounds. Shipped from

warehouse in Chicago, Detroit, Cincinnati, Minneapolis, Buffalo, Philadelphia, Kearny, N. J. or Boston, whichever is nearest you, and you pay freight from shipping point. Send orders to your Mail Order House.

GUARANTEED FOR 17 YEARS . . . SEE ACTUAL ROOFING COLORS ON PAGE 1059 . . .

90 LB. ROLL "ORIENTAL" ROLL ROOFING \$1.65
Per Roll And Up

- Guaranteed 17 years.
- Made of finest felt and asphalt, surfaced with genuine "STA-SO" Slate Granules.
- Approved by Underwriters' Laboratories.

Exactly the same construction as our 95-lb. roofing on the opposite page. The difference in weight is accounted for by the difference in lap width. Equally suitable for old or new roofs with pitch of 1½ inches or more per running foot. Can be laid over old roofing. Instructions, nails, and cement (for Laptite Fasteners and nails) are included with each roll. Rolls are 36 in. wide, 36 ft. long and contain 108 sq. ft. of material and cover 100 sq. ft. of roof surface, allowing for the 2-in. lap. Approx. shpg. wt., per roll, 90 lbs. **Shipped from Chicago, Detroit, Cincinnati, Minneapolis, Buffalo, Philadelphia, Kearny, N. J. or Boston.** Order from your Mail Order House.

STA-SO SLATE GRANULES ARE COLOR FAST

All Sears slate-surfaced roofing is covered with genuine "STA-SO" crushed slate granules. "STA-SO" slate granules are not excelled by any other surfacing for color fastness, permanence and adhesion to the asphalt coating. They are as "eternal as the hills." They insure your roof against the destructive action of age, weather, sun and fire. "STA-SO" slate granules are non-porous—will not absorb moisture and are non-fading—retaining their bright, vivid colors indefinitely. See illustration at left showing "STA-SO" slate granules and ordinary granules in separate glasses of water. Note how the surface coloring of ordinary granules dissolves and colors the water (bottle at extreme left). The water in which the "STA-SO" slate granules are contained remains colorless. This insures a roof whose colors will never wash off in any rain.

"FIRE-CHIEF" ASPHALT ROLL ROOFING

- Guaranteed by Sears for 17 years.
- Made exactly like Oriental Roofing above except for the wood "shingle" pattern embossed on the surface.
- Surfaced with genuine "STA-SO" slate granules.
- Fire-resisting; bears Underwriters' Label.

The embossed wood shingle pattern of Fire-Chief Roofing is worth the small price difference.

Instructions, nails and cement furnished with each roll. Use Fire-Chief for new or old roofs with pitch of 1½ inches or more per running foot. Roll contains 108 square feet and covers 100 square feet

of roof surface, allowing for 2-inch water-tight lap. Order roofing with 1½-inch rust-proof nails for laying over old roofing. Shipped from warehouse in Chicago, Detroit, Minneapolis, Philadelphia or Kearny, N. J., whichever is closest. Order from your Mail Order House. Shpg. wt., roll, 94 lbs.

\$2.15
Per Roll And Up

Catalog Number	Color	Size Nails Furnished	Per Roll
48 LM 488	Dark Red	1-Inch	\$2.15
48 LM 489	Gray-Green	1-Inch	
48 LM 167	Dark Red	1½-Inch	2.25
48 LM 172	Gray-Green	1½-Inch	

HOW TO ORDER ASPHALT ROOFING

The first step is to find the area of your roof, in square feet. Proceed as follows:

1. SHED TYPE ROOF
Multiply length of roof by length of rafter (Figure 1).

2. PLAIN GABLE ROOF
Multiply length of each section by length of a rafter and multiply by two (both sides identical). See Figure 2.

3. HIP ROOF
Multiply the length of each section of the roof by the length of longest rafter and divide by two. Measure each section separately. See Figure 3.

For rolls of roofing, divide by 100. For instance, if the area of your roof is 1180 square feet, you will require 12 rolls of roofing (each roll covers 100 square feet).

For bundles of shingles (shingles listed on Pages 1006-1007). Divide the roof area by the square foot coverage of one bundle of shingles as stated in the description of the shingle you select. For instance, if you selected 1½-inch Hexagon Shingles, divide the area of your roof by 50 (the square foot coverage of one bundle). This gives you the number of bundles of shingles you will require to cover your roof.

Write for Estimate Blank

If you are in doubt as to the quantity of roofing or shingles you need, write us for free Roofing Estimate Blank No. 6089L. Included is a pitch gauge which eliminates the necessity of using a ladder to measure the roof. This Estimate Blank illustrates other types of roofs and gives simple, detailed instructions for measuring them.

Fig. 1

Fig. 2

Fig. 3

HOW TO MEASURE YOUR ROOF

One method is to tie a string to a stone and throw it over the ridge of roof. Let it touch ground on other side. Knot string where it touches ground on your side. Measure string and deduct twice the eave height. If your roof is covered with wood shingles, ascertain number of inches they are laid to weather. If there are 30 rows of shingles from ridge to eave and they are laid 5 in. to the weather, the measurement of that part of roof is 150 in. or 12½ ft.

If your roof has a covering of steel or asphalt roofing, determine size of sheet of steel or width of each roll. Count number of joints. Multiply by two. Horizontal measurement can be made on the ground.

The pitch gauge included with our free Estimate Blank shows how you can measure roof angles and determine measurements from the ground, and is useful in cases where you are unable to measure by the more common methods indicated above.

"LAPTITE FASTENERS"

Heavily galvanized concave metal strips with sealed ends to make a tight joint where roofing overlaps. Makes a tighter joint than nails alone. Instructions furnished. 48 L 3045—Sufficient Laptite Fasteners and Nails for 1 roll.39¢

Shipped from Chicago, Detroit, Philadelphia or Kearny, N. J. Order from your Mail Order House. Wt., 2 lbs.

NEW 6-POINT ROOFING SERVICE

Sears new "6-Point Roofing Service" solves your roofing problems. Gives you a detailed estimate in advance, with samples, if you wish, so that you may judge quality. Provides convenient shipping points for lowest freight costs. Includes a roofing knife with your order at no extra charge. We even loan you tools for installation if you need them. Sears have attained leadership by giving a COMPLETE ROOFING SERVICE. Read about it on Page 1007.

MANY WAREHOUSES—ONE NEAR YOU

All smooth roll roofing on this page shipped from warehouse in Philadelphia, Kearny, N. J., Buffalo, Boston, Detroit or Cincinnati. We ship from the one nearest you, thus keeping down your freight costs. Only Sears have this complete warehouse service. Freight rates are low. "BEST OF ALL" Smooth-Surfaced Asphalt Roofing

"Best-Of-All" is a roofing that laughs at rain and snow—defies wind and sun. Made of first quality felt base of correct weight and thickness. Super-saturated with finest quality asphalt to make it waterproof and weatherproof. Heavily coated top and bottom with pure asphalt to "seal in" the saturant, thickly covered on both sides with flake mica to make it fire and weather-resisting. Contains no adulterants, mineral fillers or cheap substitutes which merely add weight. "Best-Of-All" won't dry up, blister, harden, crack, peel or curl and its thick, heavy coat of flake mica presents an "armor-plate" defense against the hazards of flying sparks or burning embers. Shipped from warehouse in Philadelphia, Kearny, N. J., Buffalo, Boston, Detroit or Cincinnati, whichever is nearest. Order from Philadelphia.

Guaranteed 11 Years

"Best-Of-All" Medium Weight roofing gives ample protection. Low priced so you can put a new roof on that barn, henhouse, garage, corner or outbuilding. Not listed by Fire Underwriters. Rolls are 36 inches wide, contain 108 square feet, enough to cover 100 square feet of roof surface allowing for 2-inch lap. Rust-proof, large-head galv. nails and lap cement (or Laplute fasteners and nails) and laying instructions included. Actual and shipping weight, per roll, 45 pounds.

48 LM 3031—Per roll..... **\$1.05**

Guaranteed 14 Years

"Best-Of-All" Heavy Weight roofing is ideal for garages and small cottages. Listed as Standard by Underwriters' Laboratories, Inc. Rolls are 36 inches wide, contain 108 square feet, enough to cover 100 square feet of roof surface allowing for 2-inch lap. Rust-proof, large-head galv. nails and lap cement (or Laplute fasteners and nails) and laying instructions included. Actual and shipping weight, per roll, 55 lbs.

NEW HOMES FOR OLD

AS LITTLE AS \$7.00 A MONTH BUYS
SEARS ASBESTOS SIDING
FOR AN AVERAGE 5-ROOM HOME

After

Before

Thatched Edge Design GRAY

Clapboard Design WHITE

Wavy Edge Design GRAY

3 STYLES . . EASY TO LAY . . SELF-SPACING . . SELF-ALIGNING

No need to wait until you are "in the money," or to live in a house that looks old and shabby, when for as little as \$7.00 down and \$7.00 a month you can buy as much as \$85.00 worth of new Asbestos Siding—enough for an average 5-room home. Sears Waterproofed Asbestos Siding Shingles bring the old home up to date. Give you lifetime beauty and protection. You'll never have to paint it. Never looks run down. Gives you definite insulation value as well as fire protection. And to top it all, you've enhanced the value of your property far beyond the actual cost of the siding. Convenient EASY PAYMENTS (see Page 5) make it easy to own NOW. We'll estimate your needs—send us the measurements of your home and the style siding you wish and we'll tell you the price delivered to your station. Can also be included in an F.H.A. modernizing loan—see Page 989.

Waterproofed—Choice of Gray or White

Sears Asbestos Shingle Siding has an unusually pleasing appearance, due to its deep Cypress graining and irregular butt line. All shingles are uniformly thick (3/16 in.) except Clapboard style which is 3/8 in. thick. Choice of three styles, as illustrated above. Each style comes in "Gray" or "White" color, as indicated in the listings at right. Our "Gray" is a natural stone color. Our "White" Shingles are one of the few white shingles made in which the color goes clear through the entire thickness of the shingle—not merely a surface or wash coating. All shingles are made of the finest grade of Portland Cement and asbestos fibers and are not only fireproof but waterproofed as well—a feature that insures longer life (ordinary asbestos siding shingles do not have this waterproofed feature).

Easily Laid Over Old Siding or Old Shingles. Nail holes are already punched. We furnish special cadmium-plated (non-rust) nails for face nailing, also asphalt strips for butt joints and full instructions. You will require in addition the nails listed below for top nailing. These shingles can be cut with ordinary tools but we recommend using the cutter described below. We recommend laying these shingles over our "Airlock" Insulating and Sheathing Felt listed below. Shipped from Warehouse in Chicago, Detroit, Philadelphia or Kearny, N. J., whichever is nearest. Order from your Mail Order House.

SEARS EASY TERMS SOLVE ANY MODERNIZING PROBLEM . . SEE PAGE 5

Pay by the Month

Remember, anything at Sears can be purchased on Easy Payments (provided your order is \$10 or over). You can modernize or make other improvements to your home and pay only a small amount monthly, as indicated on Page 5 of this Catalog. Orders for modernizing materials totaling \$100 or more may be financed under the F.H.A. plan described on Page 989. Under this plan no down payment is required and you may take up to three years to pay. No endorsers are required.

Galvanized Nails and Asbestos Siding Cutters

48 LM 9083—1 1/4-inch galvanized nails for top nailing when applying to sheathing boards. Use 1 pound per square. Per Lb.....8c

48 LM 9084—1 3/4-inch galvanized nails for top nailing when applying over old siding. Use 1 pound per square. Per Lb.....8c

48 LM 9106—Asbestos Siding Cutter (illustration at right). Correctly designed. Accurately machined. For fitting Asbestos Siding at chimneys, dormers,

doors, window frames, corners, etc. Also makes notches, odd cuts and nail holes if others are needed. While it is possible to do a good job without this cutter, nevertheless it will speed up the work considerably and reduce to a minimum the possibility of breakage. Enables you to do a first class job, and if returned to us prepaid and in good condition, within 60 days from date of purchase of cutter and shingles, we will refund its price. You pay only transportation costs. Shipping weight, 6 lbs.....\$9.98

SAVE UP TO 50% ON MEMORIALS

Save up to 50% on markers and monuments—and get finest quality besides! We ship direct from quarries to you, permitting you to buy a larger memorial than you might otherwise afford.

Free Catalog

This big 32-page catalog is yours for the asking. It contains illustrations of a wide variety of granite and marble monuments and markers at prices that afford tremendous savings. Sears guarantee the finest stones that can be quarried, free from flaws and blemishes. Send for this free catalog before you buy. Write Sears Personal Service Dept. for Catalog 5741.

Our Big Value Marker

Expertly cast in bronze in Verdi Antique finish. Inverted box type marker cast in one piece (not a solid marker). Supplied with "T" bolts for anchoring in cement foundation. We furnish instructions. Top face plate, 7 1/2 x 16 in. Base, 9 x 18 inches. Height, 3 inches at back, 2 in. at front. Price includes name and dates cast as illustrated above. Print name and dates clearly. For additional letters add 35c each. Shipped from Northern Illinois, and you pay freight from there.

48 LM 1214—Shpg. wt., 23 lbs.....\$9.98

Brick Design Slate-Surface Siding

- Made of finest felt—asphalt-saturated and coated, and slate surfaced.
- 4 "bricks" in one strip; easy to apply; choice of Tan or Dark Red.

Gives your home new beauty and new protection as well as added value because of the attractive resemblance to expensive face brick. Comes in strips 4 "bricks" in length. Special corner pieces (priced at right) insure a perfect job. "Bricks" are regular brick size, 2 1/2 x 8 1/2 in. Bundle weighs 70 lbs. and covers 33 1/2 sq. ft. of surface. Shipped from warehouse in Chicago, Detroit, Philadelphia or Kearny, N. J. whichever is nearest. Order from your Mail Order House.

48 LM 705—Dark Red Surface with black mortar line. Per 33 1/2 sq. ft. bundle. Shipping weight, 70 lbs.....\$1.90

48 LM 706—Tan Surface with black mortar line. Per 33 1/2 square foot bundle. Shipping weight, 70 pounds.....\$1.90

Corners for Brick Siding

Box of 50 right and 50 left-hand corners to cover 26 vertical feet. Shipping weight, 40 pounds per box.

48 LM 708—Red. Per Box.....\$2.75

48 LM 709—Tan. Per Box.....\$2.75

Special Nails for Brick Siding

Order 3/4-lb. nails to each bundle of siding. 48 LM 9083—1 1/4-inch Nails. Shipping weight, 1 pound 2 ounces. Per Lb.....8c

SPECIALLY TREATED

WITH WATER-REPELLENT PRESERVATIVE TO RESIST MOISTURE AND ROT

NOW—at no extra cost—Sears offer finest quality Western Ponderosa Pine Exterior Doors and Door Frames that are treated and impregnated with a special water-repellent toxic preservative that resists moisture, dry rot and other forms of deterioration to which doors and frames are ordinarily subjected. This treatment, proved during 15 years of use by architects and engineers on high class projects, is now available to you at no extra cost! This treatment guards against moisture or water absorption, likewise moisture-loss—reduces swelling, shrinking or warping to a minimum. It checks decay, fungus growth and blue stain. It provides an ideal primer for any finish. It gives Sears Western Ponderosa Pine doors and frames

longer life and makes them even bigger values than before. Doors made of Douglas Fir (on opposite page) don't require treating because this material is naturally decay-resisting.

We present a range of eight popular styles, built in accordance with the high standards of the National Door Manufacturers' Assn. Western Ponderosa Pine Doors (see listings below) are entirely clear and are suitable for any finish: Douglas Fir Doors are equally strong and well made but may contain a few slight imperfections not noticeable under dark stain or paint. All doors glazed with clear glass. Doors on this page are recommended for front (entrances)—on opposite page for side or rear entrances.

Style "D," Cat. No. 63 LM 885 and 63 LM 889, 6 lights 2 flat panels.

\$5.55
And Up

Style "B," Cat. No. 63 LM 145 and 63 LM 148. Excellent value; style that's always popular.

\$4.45
And Up

Style "C," Cat. No. 63 LM 364 and 63 LM 365. A door that reflects taste and dignity.

HOW TO ORDER DOORS

State catalog number of door selected. Then mention width first and height second. For "door sets," consisting of frame, trim and hardware, see prices at right end of listing. For frames or trim alone, see listing at bottom of opposite page.

SPECIAL ENTRANCES

All doors except Style "F", 63 LM 142, are shown in special entrances which we can furnish custom-built to order. See also special entrance illustrated on Page 8. Write to Sears Personal Service Dept. for prices of special entrances.

Style "A", Cat. No. 63 LM 886 and 63 LM 887. The small panes lend an air of distinction.

COMPLETE DOOR SETS SAVE TIME, TROUBLE AND MONEY

When you buy door sets with doors, your saving is greater, for in addition to your saving on the door, you enjoy the additional saving on the frame, trim, threshold and hardware which make up the set. Besides, the door will be mortised for lock at no extra charge (see detail of mortise at right). Shown at right on this and opposite page are the items included with door sets.

In the price table above we show the prices for door sets, which consist of the following items:

1. Outside Door Frame 63 LM 792 as described at bottom of opposite page. (Special entrance frames illustrated with all doors except Style "F" 63 LM 142 on opposite page can be furnished custom-built at additional cost if wanted. Write for prices.)
2. Side of Trim, either Backband 63 LM 876 or Round Edge design 63 LM 9452 illustrated and described on opposite page.

3. Oak Threshold as described on Page 1022.

4. Hardware consisting of 3-tumbler lock and 3 wrought steel butt hinges, all in dull brass finish; key and screws for hardware. Illustrated at right.

Cylinder Lock Set optional. If you wish the 2-section bronze cylinder lock set also shown at right and on Styles "A," "C" and "D" doors above, include \$4.35 extra with order for door set and specify "Cylinder Lock Set" on your order. If lock only is wanted, or if you are not ordering "door sets" see hardware pages for prices of lock only.

Information About Mortising

Doors ordered with door sets will be mortised at no extra charge for lock we furnish. Be sure to state if hinges will be on right or left hand side as you face door from outside. "Outside" of door is side on which the unremovable molding holds the glass.

PRECISION-FITTED

**FINEST CONSTRUCTION •• YOU CAN
BUY ON EASY TERMS •• SEE PAGE 5**

Choose your entrance door carefully—It's something you have to look at every time you enter your home—let it remind you of a wise purchase. Sears doors are weather-resisting and non-warping and meet every requirement of hospitable appearance and service. You'll not find better construction anywhere, yet you'll save money at Sears prices.

An important feature of Sears doors is the precision-fitted, attractively

grained panels. These are solid raised pine on Door "B" illustrated on opposite page. On all doors on this Page the panels are 3-ply, laminated Fir, laid cross-grain and firmly cemented. These panels resist warping and splitting. Bead and cove moldings are a part of the solid stiles and rails. Accurate milling gives extra tight fitting joints.

All doors glazed with high quality clear glass that is free from distortion.

Pay by the Month

Why delay modernizing your home when Sears Easy Payment Plan permits you to enjoy such improvements by paying only a small amount down? It's the modern, convenient way to buy and the small monthly payments will not be a burden. Read the whole story on Page 5 of this Catalog.

Send for Free Estimate

We maintain a staff of experts to assist you in building or repairing and at no obligation we will give you an accurate estimate of the cost of materials delivered to your station, such as millwork, lumber, roofing, insulation, etc. This estimating service is free—take advantage of it.

CONVENIENT SHIPPING POINTS

All items on these two pages shipped from our own factory in Newark, N.J. or warehouse near Boston, whichever is nearer you. You pay freight only from nearer point. Send orders to our Mail Order House. Large stocks of all items at these convenient points assure immediate shipment.

UTILITY OR STORM DOORS

Catalog Number 63LM6808 (see listing below) is a "Utility" or "Storm" Door, similar to Style "G" Door illustrated directly above, except is 1½ inches thick, and is one-quarter inch wider and 1 inch higher than sizes shown in listing below.

NEW F.H.A. FINANCING PLAN

You can modernize with new doors under the new F.H.A. Financing Plan described on Page 989. Sears will assist in arranging your loan. No endorser—no down payment—low finance charges and up to 36 months to pay—are among the desirable features of this convenient plan.

PRICES OF FRAMES AND TRIM SETS SOLD INDIVIDUALLY

First Quality Yellow Pine Door Trim

Carefully banded to reach you bright, clean, ready for stain, paint or any finish. Av. shpg. wt., 15 lbs. per set.

Backband (2-member) Design Door Trim—Head and side Casings ¾x3¾ in.; backband molding ¾x1¼ in. **Round Edge Design Door Trim**—Head and side, casing ¾x3¾ in.

First Quality Ponderosa Pine Door Frames

Specially treated with water-repellent preservative (at no extra cost) to resist moisture and decay.

Outside casings are 1½x4½ in.; jambs, 1½x5½ in., rabbeted for doors 1½ or 1¾ in. thick. State which is wanted. Sill, 1½x7½ in.; drip cap 1½x1½ in.

We list prices of frames separately at right in case you don't need the complete door set which includes the frame. When ordering, state width, height and thickness of door in that order. Sizes shown are outside

measurement of door and inside measurement of frame. 2x4 stud openings should be about 3¼ or 4 in. wider and about 5 in. higher than door. Thus, for a door 2 ft. 8 in. by 6 ft. 8 in., prepare the rough opening about 3 ft. by 7 ft. 1 in. Write for prices on door frames for stucco, brick veneer or solid brick wall construction. Shipping weights range from 41 to 51 lbs.

Frames and trim shipped unassembled to save freight. Easily put together.

SEARS  **PAGE 21013**

PRE-FITTED

When you buy a Glazed window from Sears you get more than merely a double-hung sash—you get a sash whose members are accurately fitted to each other—in other words, **pre-fitted**. You get a window with bottom rail already beveled to fit the sill—to insure weather-tight joinings. A window whose straight edges and square corners insure ease of fitting to any standard frame.

SPECIALLY

HOW TO ORDER When ordering windows (1) give catalog number; (2) give full width in feet and inches and (3) give full height in feet and inches. The overall size of a window is the inside measurement of frame in which window hangs. Window Sets include Pre-Fitted Glazed Window, Window Frame, Trim and all Hardware, Weights and Sash Cord.

You Can Buy on Easy Terms

Why wait to install new windows when all you need is a small down payment? Make up an Easy Payment order of \$10 or more now of any merchandise Sears Sell and pay a little each month—details on Page 5.

Sears TRU-FIT, Check Rail, Pre-Fitted and Treated Windows are made of finest Western Ponderosa Pine, 1 3/4 inches thick, rigidly mortised and tenoned at all joints for extra strength. When properly hung in standard frames, they will always lift quietly and easily, whether for new or replacement work. REMEMBER, TOO, that these windows are treated with **water repellent Toxic preservative** for longest life and are **pre-fitted** as described above, to save you time and expense. All windows machined and sanded and glazed with clear glass.

QUICK SHIPPING SERVICE from warehouse in Chicago, our own millwork factory in Cincinnati, or Newark, N. J. whichever is nearest you. Order from your Mail Order House.

Check-Rail Design

All windows (except "Plain-Rail" windows on opposite page) are snug-fitting "Check-Rail" design. Upper and lower meeting rails meet at an angle, see detail above. Prevents rattling—keeps out wind, dust and rain.

Shipping Weights

Weights shown for "windows only" are actual weights, to enable you to order the correct size of sash weights. For shipping weight of window, add 15 lbs. for packing when ordering a quantity of 6 or less windows. Windows are packed up 6 to a bundle.

Send for Free Estimate

No matter what you need in building materials—millwork, lumber, roofing, insulation, paint or other modernizing materials—Sears save you money. Send us a list of what you need. We will figure the cost delivered to your station. There is no charge for this expert service.

Why We Recommend Complete Window Sets

We recommend complete window sets because they cost less than the total price of the individual items! You also save time in fitting and waste in cutting. Here's what you get in a complete window set:

One Glazed Check-Rail Window as above, "treated" and "pre-fitted."

One First Quality Window Frame, "treated" and "pre-fitted", as illustrated with windows above and described on opposite page.

One set of Interior Trim. Choice of Backband or Round Edge Design as described on opposite page.

Four cast iron Sash Weights as illustrated and described on opposite page.

Enough heavy sash cord for one window.

Two bar-top sash lifts and **one sash lock fastener**, in dull brass finish.

Illustration at right shows the items included with complete window sets (in addition to window). Choice of back band or round edge design trim as shown. Prices of complete window sets are shown at left. See opposite page for frames and trim sets sold individually. See Page 862 for prices of window hardware also sold separately.

TREATED FOR LONGER LIFE!

NOW—at no greater cost—Sears bring you windows and frames that are protected from decay and distortion by a tested and approved water-repellent, Toxic preservative. This proven treatment of millwork has been specified by architects and engineers for 15 years on high class projects and is now made available by Sears buying power to every Sears customer. We give you this added protection at no extra cost. It gives you resistance to moisture or water absorption as well as moisture loss, reducing swelling, shrinking, warping and twisting to a minimum, with the

result that your windows will always remain true, snug-fitting and non-rattling. It checks all types of decay, fungus growth and "blue stain." Saves time and cost of prime coat; provides an ideal primer for paint, varnish, enamel or stain. Finishes last longer. Because Sears own millwork factories are among the world's largest, you get the benefit of our tremendous manufacturing power. Large stocks of every item in mammoth warehouses permit us to make immediate shipment from a point that is near you, thus saving you freight.

"Mullion" Windows

We can furnish Mullion or "Twin" Frames or Complete "Mullion" or Twin Window Sets. When wanted simply mark your order "Mullion" Frame or "Mullion Window Set" and for price allow twice the price of a single unit of the same size. For example—for a mullion complete window set, size 2 ft. 4 in. x 4 ft. 6 in., 63LM861, allow total of \$12.34; or for a mullion (twin) window frame only, design 63LM789, allow total of \$5.02. Shipped unassembled. If you need Mullion Trim allow twice the price of a single side of trim of the same size. Simply mark your order "Mullion Trim."

Triple window trim or sets are 3 times the price of a single. Mark your order "triple."

12-Light Check-Rail Windows

The illustration above shows an outside view of our 12-light "Check-rail" design window, 1 3/4 in. thick, Cat. No. 63LM7195 hung in our standard frame 63LM789 (priced below). Both "Pre-fitted and Treated" with special water-repellent Toxic preservative. This window can also be furnished in "Plain-Rail" style illustrated at right. Recommended for bungalows and cottages. Complete window sets are fully described on opposite page.

SHIPPING POINTS

Quick service! All items on this and the opposite pages shipped from our own factory in Newark, N. J. Send orders to Philadelphia.

EASY PAYMENTS

The easy, convenient way to modernize. Put all items in one order—millwork, roofing, lumber, insulation. Pays small amount down—a little each month. See Page 5 for details.

4-Light Check-Rail Windows

The illustration above shows an outside view of our 4-light design "Check-Rail" Window, 1 3/4 in. thick, Catalog Number 63LM7189 hung in our standard frame 63LM789 priced below. Like all other Sears Check-Rail Windows, it is "Pre-Fitted" and "Treated" with special water-repellent Toxic preservative to resist the destructive action of moisture, dry rot, and blue stain. Complete window sets fully described on opposite page.

Plain Rail Windows

Made of First Quality "Treated" Western Ponderosa Pine, 1 3/4 in. thick. Glazed with clear glass. Offered in 8-light and 12-light styles as illustrated. This type of window has "plain-rail" (no bevel) at meeting point of upper and lower sash. To hold upper and lower sash in open position, use spring bolts listed on Page 862. Frames for plain rail windows not available.

Sears Window Frames Are Treated With Preservative—At No Extra Cost

Illustrated with windows above and on opposite page. Drip cap design. Made of Western Ponderosa Pine, "Treated" (as described at top of page) and precision-fitted at the factory. Accurate milling assures smooth-running sash. Rust-resisting "jam-proof" pulleys included. Pockets for sash weights already cut. Outside casings, 1 1/2 x 4 1/2 inches; jambs, 5 1/2 inches wide, including parting and blind stops; sill, 1 3/4 x 7 1/4 inches; drip cap, 1 1/2 x 1 1/2 inches. Illustration at left shows cross section of frame installed in wall, showing also position of window and trim. (Trim shown is back-band 2-member design.) Shipped unassembled, easily put together.

How to Order Window Frames

When ordering, give width first. Size of wall opening should be 6 inches wider and 5 inches higher than the outside measurements of window. For sizes, see listing below. Measurements shown are inside measurements of the frame. These should be the same as the outside measurements of the window. Average shipping weight of frame, 35 pounds.

Backband and Round Edge Design Window Trim

Made of First Quality Clear Yellow Pine. Choice of Backband or Round Edge design. See small view on opposite page for illustration of each type of trim.

Backband (2-member) design has round edge side and head casing and apron 3/4 x 3 1/4 inches; backband molding, 3/4 x 1 1/2 inches; stool, 3/4 x 3 1/4 inches; stops, 3/4 x 1 1/2 inches. We give below the prices of Backband and Round Edge Trim sold separately in case you do not need the complete window set which includes the trim. Average shipping weight, trim sets, 17 pounds.

Round Edge (1-member) design has round edge side and head casing and apron 3/4 x 3 1/4 inches; stool, 3/4 x 3 1/4 inches; stops, 3/4 x 1 1/2 inches. Head casings are not hollow back, therefore entering the head and side casings is unnecessary. Simply butt together, eliminating unsightly open miter joints.

Remember—you can include trim sets or any other item of millwork, roofing, insulation, lumber, paint or other modernizing material in an Easy Payment Order as described on Page 5. Just a small amount down will take care of a lot of modernizing!

F. H. A. Loan Plan

A convenient method of modernizing. Use the new F.H.A. Financing Plan. No down payment—no endorsers—up to 36 months to pay and new low finance charges. See details on Page 989.

Sash Weights

Smooth cast iron. Each window requires four weights, each 1/4 the weight of window. Shipped from Newark, N. J., Cincinnati, Baltimore, Md., Darby, Pa., Cleveland. Order from Philadelphia Specify Catalog No. 63LM7200. State size.

SPECIALLY TREATED AGAINST MOISTURE AND ROT

YET "STORM-TITE" COMBINATION DOORS COST YOU NO MORE!

- NOW—Specially treated with water-repellent toxic preservative to resist weather, moisture, decay, fungus growth and blue stain—at no extra cost.
- Made of Western Ponderosa Pine, 1½ inches thick.
- All joints mortised, tenoned, pinned and glued with waterproof glue. Choice of four popular styles.
- Furnished in the natural wood—sanded smooth, ready for any finish.
- Four special fasteners included to hold panels tight—prevent rattling. Panels cannot be removed from the outside.
- Fine quality clear glass for storm panels—held with molded wood beads. Choice of Bronze or Galvanized screen wire.

Everyone likes to save time, effort or money and Sears STORM-TITE Combination Doors enable you to do all three. They are double-purpose doors, screened for summer and glazed for winter, and they stay on the same hinges the year around. You change only the panels. Saves time because they eliminate the old routine of rehanging each spring and fall and storing the extra doors. Saves effort because instead of a heavy door to unhinge and store away, you change only the panels. Saves money because one door serves the purpose of two.

In addition, these doors are specially treated with a water-repellent preservative that protects against such common agents of deterioration as decay, fungus growth, blue stain, etc. And also acts as a prime coat or base for paint or varnish. ALL THIS AT NO GREATER COST!

STYLE "A"
BARGAIN LEADER \$379
And Up

As strong and well made as our other styles, but not quite as high grade pine. Screen wire is permanently affixed; only the storm panel is removable. A good serviceable combination door at a price that saves you money.

STYLE "B"
OUR FINEST \$568
And Up

Storm panel has 12 lights, affording utmost light in winter and air circulation in summer. Furnished only with 16-mesh copper-bronze wire. The small panes of glass lend an air of distinction to any entrance.

STYLE "C"
OUR BIG VALUE \$445
And Up

Has 6-light storm panel for winter use and divided screen panel for summer. Two horizontal raised panels below the opening give this door an attractive appearance. It's priced to give you a substantial saving.

STYLE "D"
OUR FEATURE \$495
And Up

Has a large screen panel—desirable for summer as it permits freer circulation of air. In winter, large 8-light panel admits more light. This design is suitable for any type of entrance—front, side or rear.

Bronze or Galvanized Wire

Doors "C" and "D" are offered in choice of 16-mesh galvanized or Antique-bronze wire for screen panels. Door "B" is offered only with 16-mesh Antique-bronze wire. Door "A" is offered only in 14-mesh galvanized wire. We recommend the Antique-bronze wire because it is guaranteed for 25 years—never rusts or needs painting. It is well worth the small difference in price. Our galvanized wire is made of pure open hearth steel and coated with pure zinc, and is guaranteed for 5 years. Screen wire held taut and firm by wood molding. Door locks and hinges not included—see Index at back of catalog for hinges and locks.

We Ship From Convenient Points

All doors are shipped securely bundled from Mail Order House in Chicago, our own factory in Cincinnati or Newark, N. J., or warehouse near Boston, whichever is nearest you. You pay freight from nearest point. Order from your Mail Order House.

You Can Buy on Easy Terms—Details on Page 5

Now everything at Sears can be bought on Easy Terms (see Page 5). You can include a combination door with other merchandise in an Easy Payment order and pay for it by the month. Take advantage of this opportunity to

modernize your home conveniently. Remember, Sears guarantee quality, satisfaction and savings on everything you buy, whether for cash or on Easy Terms. If you prefer the FHA Finance Plan, see Page 989.

ALL SEARS GLAZED SASH PROTECTED FROM DECAY

WITH WATER-REPELLENT PRESERVATIVE . . AT NO EXTRA COST

NOW—Sears Glazed French Windows, glazed sash and Frames are protected from decay and distortion by a carefully tested and approved water-repellent Toxic preservative. This proven treatment has been specified by architects for 15 years on expensive projects. Sears give it to you at no extra cost! It checks all kinds of decay, fungus growth and blue stain, and makes sash last longer than untreated sash.

Sears French Windows will give your home a definite air of distinction. They may be opened full length, thus providing maximum ventilation. They admit more light than ordinary windows. Sears offer them at money-saving prices.

For Single French Windows, see 6-light sash 63 LM 5080 below or 8-light sash 63 LM 7018 on opposite page.

Sears French Windows are made of First Quality Western Ponderosa Pine, 1 3/4-in. thick, glazed with clear glass and fitted with astragal to cover and seal the joint between sash. "Swing-out" or "swing-in" style. Bottom rails of sash to swing in are rabbeted to fit our Frame No. 63 LM 619. Shipped from warehouse in Chicago or our own factory in Cincinnati or Newark, N. J., whichever is nearest. Order from your Mail Order House.

Frames and Trim Sets for French Windows

FRAMES: Protected with special water-repellent preservative as described above. We use weather-resisting thoroughly seasoned lumber, accurately milled and tightly assembled. These frames are made for use with the various sash listed below, as well as the casement sash (French Windows) shown here. For regular frame house walls (2x4 studs covered with sheathing and siding or shingles outside, and lath and plaster inside). Outside casings 1 1/4 inches thick; jambs 1 3/4 x 5 1/4 inches; rabbeted to fit 1 3/4-inch sash. Furnished in

two styles 63 LM 617 for sash to swing out, and 63 LM 619 for sash to swing in. Order by catalog number and state size. Average shipping weight of frames, 32 pounds. See shipping points above.

TRIM: First Quality Yellow Pine—no knots, blemishes or imperfections. Two types, "swing-in" or "swing-out." Choice of Backband (2-member) or Round Edge (1-member) as illustrated below. Matches window trim described on Page 1015. Order by catalog number and state size. Av. shpg. wt., 12 lbs. per set.

SEARS EXCLUSIVE PATENTED OVERHEAD DOOR

\$26.50
Cash

ONLY \$3 DOWN
SEE PAGE 5

Complete door includes all necessary, guaranteed, extra heavy hardware—consisting of 3 pair of 8-inch "T" hinges, angle iron guide tracks, auto door type handle lock, ball bearing triple roller guides, pulleys, steel center rope cable and all necessary screws, cord, wire, clamps and mold for making concrete counterbalance weight. To save freight costs, this weight is not included. Shipped from Our Mail Order House, factory in Newark, N. J., Cincinnati, Ohio or Warehouse in Boston, whichever is nearest. Order from your Mail Order House.

63 LM 423—Overhead Door. Shipping weight, 189 lbs.. \$26.50

THE SIMPLEST AND SAFEST
OVERHEAD DOOR MADE . .
AND ONLY SEARS HAVE IT!

- A fully patented, exclusive Sears Design
- Consists of two sections, upper and lower, hinged in the middle and permanently suspended at the top
- Made of smooth-sanded genuine Douglas Fir, 1 3/4 in. thick panels of 3-ply Douglas Fir Plywood
- Upper section glazed with clear glass firmly held with molded wood beads
- All corners and cross members are accurately milled
- Size, 8 ft. wide by 7 ft. 10 in. high; clearance, 7 ft. 2 in. in height when opened
- Easy to install—we furnish hardware and instructions

No more struggling to open a garage door blocked by snow or ice! No more damage due to doors blowing open! No more heavy work opening or closing, or repairs due to getting out of order. Sears offer a door that definitely ends these troubles. Ordinarily, such a door should cost more, because it gives more, but that's not Sears policy. We give you this improved door for about half what you would pay for an ordinary overhead door!

This Patented Overhead Door is the simplest, safest, and easiest operating door on the market. It is fully patented and can be purchased only from Sears. It's the ideal door for private or public garages, gas and oil service stations, factories, fruit and vegetable markets, road stands and many others.

The operation of the door is simplicity itself—nothing to get out of order. Door is balanced by counterweight hung from two ropes suspended from pulleys.

Showing ease of opening door from outside—a slight pull outward, and the door literally floats up out of the way, forming protective overhead canopy.

F.H.A. Let F.H.A. Financing plan help solve your modernizing problem. See Page 989.

Sears Guarantee Quality

Dress up your home with one of Sears Modern Interior Doors. Their outstanding beauty is backed up by faultless construction and precision workmanship. Like everything else at Sears, Sears guarantee that the materials, the construction and the finished door will give you utmost satisfaction. And it goes without saying that you also make a substantial saving in spite of the high quality. Shown at right are the prices of doors only, also "door sets" consisting of jamb, trim and hardware. We recommend purchase of "door sets" because they eliminate cutting and fitting, provide a first class job, afford extra savings and you get a door already mortised for lock. See description of "door sets" at right below.

Easy to Order—Here's All You Have to Do

State catalog number and size, giving width first. If the door jamb or frame is already in place, take size from that. For new openings, first make rough opening 3 in. larger

each way than finished door. This allows space for setting door jamb, supporting blocks and finished floor. See below for description of Door Sets, Jamb and Trim.

Complete Door Sets Save Time and Money

When you buy "door sets" with doors, your saving is greater, for in addition to your saving on the door, you enjoy the additional saving on the jamb, trim and hardware which make up the set. And on top of that, any door you select with the set will be mortised for the lock at no extra charge (see detail of mortise at right). With door sets there is no sorting or hunting for various parts. Reduce carpenter bills... and get a better job! Every piece of trim is cut to approximate size—no waste, no loss, no shortage. And you take no chance of spoiling the door because of poor mortise. Shown at right are the items included with door sets.

In the price table above we show prices for door sets for any door listed on these two pages. "Door sets" consist of:

- 1. INSIDE DOOR JAMB** of 1st Quality Pine, 63 LM 7969 as illustrated at right. Size, 3/4x5 3/4 inches with stops 3/4x1 3/4 in. Head jamb is dadoed into side jamb. Sanded smooth. (If wanted separately, see prices above and state whether with or without stops. Average shipping weight of jambs only, 18 pounds.)
- 2. INSIDE DOOR TRIM: (TWO SIDES)**, either Backband (2-member) design 63 LM 876 or Round Edge (1-member) design 63 LM 9452 as illustrated at right. Made of 1st Quality Yellow Pine. (If wanted separately, see prices in table above. Backband trim has casings 3/4x3 3/4 inches, with backband molding 3/4x1 1/2 inches. Round Edge trim has casings 3/4x3 3/4 inches. Average shipping weight, of trim set only, 15 lbs.)
- 3. ONE SET OF HARDWARE** consisting of solid steel bit-key 3-tumbler lock and 2 wrought steel butt hinges, all in dull brass finish. Also key and screws for hardware.

NOTE: Doors ordered at the same time with door sets are mortised at no extra charge for lock we furnish—a saving of time and money for you.

DOORS "HAVE EVERYTHING"

PRICE SAVINGS... BUY ON EASY TERMS... SEE PAGE 5

Hard to believe that doors of such sterling high quality can be had at these low prices—but only Sears can offer such values! Our millwork factories are among the world's largest and most modern. The precision milling and fitting are unsurpassed. Each door is attractively grained and smoothly sanded, ready for any finish. Doors are 1 3/4 inches thick and conform in all respects to standard grading practice adopted by National Door Manufacturers' Association. Doors of Douglas Fir have

solid Fir side, top, bottom and cross rails and beautifully grained 3-ply laminated Douglas Fir panels. Doors of No. 2 Fir, while lower priced, are as strong, serviceable and well made as doors of No. 1 Fir but may have a few small imperfections that are usually concealed under dark stain or paint. Remember—you can include doors and other millwork in an Easy Payment order and send only a small down payment with your order. See Page 5.

Style "N," 3-flat-panel design. Catalog No. 63LM756. Comes in Douglas Fir only.

\$235
And Up

Style "P," Single-Insert-Panel design. Cat. No. 63LM181. Comes in Douglas Fir only.

\$342
And Up

Style "R," 5-flat-panel design. Catalog No. 63LM204. Comes in No. 2 Fir only.

Mirror Doors

A Mirror Door is a real necessity. Serves an extremely useful purpose in bedrooms, halls and other rooms and lends an air of distinction as well as making the room seem larger. Our Mirror Door pictured directly above is glazed on one side with finest quality, thick, polished, genuine-plate glass mirror. Absolutely clear images are reflected from any distance. The door itself is otherwise the same as our Style "P" door at left, being made of First Quality Douglas Fir, 1 3/4 in. thick. Mirror sets flush with face of door. This door, being heavier, requires three 3 1/2-inch butt hinges instead of the usual two as on other interior doors. "Door sets" are illustrated and described on the opposite page. Sears low prices afford definite savings.

Send for Free Estimate

Let our expert estimators figure the cost of your modernizing or remodeling needs. Send us your list of building materials required—millwork, lumber, roofing, insulation, paint, etc., and we will send you the complete cost including transportation charges to your station. We often are able to save our customers considerable money by eliminating needless special or "made-to-order" designs that increase the cost but add nothing to the value of your home.

NEW F.H.A. FINANCE PLAN

No money down when you finance a modernizing program under F.H.A. Plan. Up to 36 months to pay, new low finance charges. Details on Page 989.

French Doors Make Rooms Seem Larger

Interiors seem so much larger when rooms are connected with French Doors. Put them between living room and dining room or at entrance to sun parlor or vestibule. They are really interior windows, giving extra light while still affording privacy. Sears offer First Quality Douglas Fir French Doors, 1 3/4 inches thick, of approved standard design, nicely grained, accurately milled, tightly assembled, well glazed and smoothly sanded ready for any finish. Standard "T" Astragal furnished to cover and seal joint between the two doors. Offered in choice of 10-light or 15-light designs, in pairs. Small view at left shows glass arrangement on 15-light design. For single French or Terrace door, see our 15-light design 63LM 886 on Page 1012.

We also list, for your convenience, outside door frames, inside door jambs and door trim to fit these French doors. These items are described on opposite page. All items shipped from our own factory in Newark, N. J. Order from Philadelphia.

HOW TO ORDER FRENCH DOORS

State catalog number, thickness and size of pair. We recommend using three pair 3 1/2-inch butt hinges for hanging. See Index for lock sets. We recommend you use only our standard "French door locks" with these doors. Frames, Jambs and Trim are described on Page 1020: These items are also listed below.

LOWEST PRICES ON QUALITY LUMBER

All Sears lumber is accurately milled by the most modern machinery, and strictly up to or better than the grade indicated below, which is in accordance with the practice of responsible National Lumber Associations. "B and Better" Grade is the finest lumber ordinarily used and is often called Clear. The "A" Grade Cedar is practically flawless. "No. 2 Common" Grade and "D" Grade, may contain a few imperfections, but they do not affect strength or usability. No. 3 Common contains imperfections which do not affect usability as shoving.

Regardless of your needs in lumber, Sears can supply you. We have countless other items and patterns in stock, and in a variety of woods. Tell us what you want and we will quote you on the most suitable size and grade for your needs. We guarantee to save you money!

All lumber items are shipped direct from our own factory in Newark, N. J. Order from Philadelphia.

For Easy Payments, see page 5.

(L) 63 LM 97	Shelving	3 1/2 x 11 1/2	W. P. Pine	No. 3 Common	..	240 lbs.	4.95

W. P. Pine means Western Ponderosa Pine. Items (B), Ceiling and (C) flooring are Flat Grain and wide indicated is face width not including tongue. Lumber furnished in random (mixed) lengths. For specified lengths write for price.

SEARS FINEST OAK FLOORING

Nothing can match the beauty of Oak Flooring, and Sears low money-saving prices make it easy to own. It is easy to clean and keep clean. Doesn't split or splinter or form dirt-catching crevices. Takes a high gloss and with proper care will last a lifetime. Adds materially to the permanent value of your home. Sears grades meet fully the standard grades maintained by the National Oak Flooring Manufacturers' Association. All Sears flooring is smoothly finished, tongued and grooved with ends matched. None better made at any price. Furnished in standard length assortments according to grade.

"Clear" or first grade is the best grade of flooring made. It is preferred for principal rooms where floors are largely exposed. Practically free from all imperfections. Bundled in lengths of 2 ft. and up, not to exceed 20% under 4 feet, 80% in longer lengths. Average length, 5 feet.

"Select" is the second grade of flooring. Suitable for any room. Permits minor defects only, which do not affect general appearance or wearing quality. It is equally suited for use in low priced homes, stores, offices and apartments. Bundled in lengths of 2 feet and up, average length 4 feet.

"No. 1 Common" is third grade of flooring and is suitable for most any room. This grade permits some imperfections which do not affect general appearance or wearing quality. Bundled in lengths of 2 feet and up, the average being 3 feet.

HOW TO ORDER OAK FLOORING

Multiply the width of the room by the length to find the number of square feet to cover. Add to this one-third extra to allow for the tongue and groove when ordering 1 1/2 x 2 1/2-inch or 3/4 x 1 1/2-inch size, or one-fourth extra when ordering 3/4 x 2-inch size. EXAMPLE: A room 10x10 feet contains 100 square feet, plus one-third equals 134 square feet of 1 1/2 x 2 1/2-inch flooring needed, or 125 square feet of 3/4 x 2-inch flooring.

Flooring shipped promptly from our own factory in Newark, N. J. Send orders to Philadelphia.

Catalog Number	Size Inches *	Grade	Shpg. Per Foot	Price Per 100 Sq. Ft.
63 LM 7426	3/4 x 1 1/2	Clear	1 lb.	\$6.75
63 LM 7447	3/4 x 2	Select	1 lb.	5.75
63 LM 7445	3/4 x 2	Clear	1 lb.	7.15
63 LM 7435	1 1/2 x 2 1/2	No. 1 Common	2 lbs.	7.25
63 LM 7434	1 1/2 x 2 1/2	Select	2 lbs.	9.15
63 LM 7433	1 1/2 x 2 1/2	Clear	2 lbs.	8.55

*NOTE: Above measurements do not include width of tongue.

HOW TO LAY OAK FLOORING

Use 8-penny flooring nails placed 16 inches apart for 1 1/2-inch flooring and 4-penny casing nails placed 8 inches apart for 3/4-inch flooring. See Page 855 for these nails. Hardwood flooring should be laid on a sub-floor, preferably of 1x6 boards. Between sub-floor and flooring we recommend the use of our Tarred Felt Sheathing 48 LM 3054 on Page 1010. Leave about one-half inch between flooring and base board to allow for expansion. This space will be covered by the quarter round or base molding. Lay the flooring at right angles to sub-floor. All tongued and grooved flooring should be blind-nailed. Use 1 1/2-inch flooring for new floors; use 3/4-inch flooring for either new floors or over old floors.

RED CEDAR SHINGLES

Sears Shingles are made of genuine Red Cedar that means positive protection, appealing beauty, long life, extremely low cost of upkeep and a high degree of insulation. Red Cedar Shingles will resist the onslaughts of weather and present an appearance that is at all times stylish, artistic and substantial, will last many years. Figured by the cost per year of service, Sears Red Cedar Shingles are as high quality and about as low priced as you can buy.

Offered in two styles, plain or stained. Stained shingles are offered in choice of six handsome colors. If you wish to purchase plain shingles, you can probably effect a slight saving by dipping or painting them yourself. Sears Shingle Stain is ideal for this purpose—see Page 1053.

PLAIN RED CEDAR SHINGLES

Shipped in bundles from factory in Newark, or Boston, whichever is nearer. Send order to Philadelphia. Illustrated above. Choice of two grades.

63 LM 740—No. 2 Grade; 16 inches long. These shingles are 12 in. clear or better. Do not contain more than 1 in. of sapwood for the first 10 in. 5 of these shingles measure 2 in. thick at butts. 1 bundle when laid 5 in. to the weather covers 25 sq. ft. Shpg. wt., 36 lbs. Price per bundle..... \$1.29

63 LM 731—No. 1 Grade; 16 inches long. These shingles are all edge grain, strictly clear and contain no sapwood. Size, thickness, coverage and weight the same as No. 2 grade. Shipping weight, 36 pounds. Price per bundle..... \$1.49

Remember, you can include Sears Red Cedar Shingles in an F. H. A. loan, as indicated on Page 989 or an Easy Payment order as on Page 5.

FIR PLYWOOD WALLBOARD

FIR PLYWOOD PANELS

Both sides of these panels are practically flawless and are sanded to satin smoothness. For use where both sides are visible in actual use. The 1/4 and 3/8-inch panels are made of 3 plies, and the 1/2-inch panels are made of 5 plies laid cross-grain and cemented together under terrific hydraulic pressure, with water-resisting glue, to form a solid sheet of plywood, tough, warp-resisting and non-splitting; suitable for hundreds of uses. With strength, rigidity, insulation value, permanence, economy and beauty, this plywood is ideal. It's preferred everywhere for table tops, wide shelves, closets, counter tops, cabinet and toy making, trailer lining, display racks, etc.

Plywood panels have gained wide popularity because of their all-around convenience, beauty and economy and at Sears bargain prices your savings will be even greater. Shipping weight, per square foot of 1/4-inch panels, 12 ounces; 3/8-inch panels, 1 pound; 1/2-inch panels, 2 pounds.

TERMS Include these panels or any other materials in a Sears Easy Payment Order—see Page 5 for complete information.

REAL LUMBER • IN ITS STRONGEST FORM!

Face side of this 3-ply wallboard is practically flawless and is sanded to satin smoothness. The other side, not being exposed when in use, may contain a few imperfections that do not affect strength or usability. Sears Plywood Wallboard has **BEAUTY** because of natural wood grain; **STRENGTH** equal to four times that of ordinary lumber; **CONVENIENCE** because of ease of handling large panels; and **ECONOMY** that permits substantial savings at Sears low prices. We use only selected Douglas Fir, scientifically dried. Huge logs are rotary cut (peeled) and sheets cut into large panels. These are laid cross-grain and firmly cemented with special moisture-resisting glue under tremendous hydraulic pressure, producing a bond of exceptional strength. As a result, shrinking, warping, peeling or splitting are practically unknown. Nails can be driven close to edge of sheet. Face side perfectly sound—no knots, pitch pockets or open imperfections. When stained, natural beauty of rich graining is enhanced. Takes paint, enamel, lacquer or varnish. Finish thickness, 1/4-inch. Ideal for lining basements, attics, storage rooms, garages, cabins and other buildings, as well as for making shelves, table tops, partitions, display racks, signs, feed bins, toys, etc. Other uses indicated in small views above.

Order by Catalog Number 63 LM 632 and state size wanted.

Ironing Board

Built-in type. Made of 1st Quality Pine sanded smooth. Fits between studding set 16 in. on centers. Rough opening should be 81 in. high. Door is 6 ft. 8 in. to line with an average room door. Cabinet is 4 3/4 in. deep to fit a standard 2x4 stud wall recess. Ironing board is approximately 11 1/2 inches wide, 49 inches long and 32 inches from floor. Sleeve board is approximately 5 in. wide and 23 inches long. Rigid wood braces. Packed in carton. Nails and assembly instructions included. 63 LM 2230—Complete with door, trim and hardware. Shpg. wt., 53 lbs. \$5.75

China Case

Adds Colonial charm. Triangular shape to fit in corner. Made of 1st Quality Pine. Consists of built-up front complete as shown—with panel door below and glass door above; top; bottom which forms one of shelves below counter; counter shelf; 3 shelves in upper section and 1 in lower section. Complete with shelf cleats. Sides, ends and back unnecessary and not furnished. Ht., overall, 88 in.; width across front, 34 in.; maximum depth up to, 17 in. Chromium finished knobs, catches and hinges. Nails and instructions included. Shipping weight, 65 pounds. 63 LM 422 \$15.95

Breakfast Nook Set

Not only accurately milled and precision-fitted of first quality lumber to give you finest construction obtainable, but definitely lower priced as well. Distinctive, cozy and compact. Desirable for either large or small families because it saves much time, labor and steps. No need to set the dining room table for light meals or snacks. No carrying of dishes from the dining room. Accentuates the cosiness of the kitchen. It's compact and easily fits into the average kitchen. Consists of one table and two benches, made of 1st quality Pine and sanded smooth for any finish. Requires a space 6 feet wide by 4 feet deep. Packed in sections to secure lowest shipping charges. Easily assembled. Packed in dustproof cartons.

Specifications: Table width, 2 feet 2 inches; length, 3 ft. 8 in.; height of table top from floor, 2 ft. 6 in.; seat width, 1 ft. 1 1/2 in.; length, 4 feet; height overall, 3 ft. 5 in. Seats, seat ends, table top and ends, 1 1/2 in. thick. Nails and instructions included. Shipping weight, 110 lbs. 63 LM 9612—Each. \$12.95

CUT FUEL BILLS \$33 A YEAR INSULATE WITH SEARS ROCK WOOL

- Saves up to $\frac{1}{3}$ in fuel costs
- Moderates summer temperatures 8° to 15°
- Vermin-proof, fire-proof, clean, odorless and moisture-resistant. Deadens sound.
- Thermal Conductivity rating is 0.26 BTU's per inch of thickness. Approved by Underwriters' Laboratories, Inc.
- Choice of Waterproof Paper-Backed Batts, "Pellet" Type or "Loose" Type

Line your house with a 3-inch layer of this efficient, non-conducting heat stopper and you can put about one-third of your former fuel cost right back in the bank. In fact, a 3-inch layer of Sears Rock Wool does the job of a 5-foot layer of stone or concrete when it comes to shutting out heat or cold. Keeps your home cozy, snug and warm and with far less fuel! No wonder millions of people are singing the praises of Sears insulation. But that's not all the virtue there is in Sears Rock Wool—it keeps out summer heat equally as well as winter's cold—a real "air-conditioner"—in all seasons.

Made From Molten Rock

Sears Rock Wool is the finest—made from molten rock, blown by powerful jets of live steam into millions of tiny, porous fibers. It is fireproof, even the white hot flame of a blow torch does not affect it.

The pictures at right graphically show the savings effected by Sears Rock Wool Insulation. Fig. 1 shows estimated fuel cost of \$100 per season when insulation is not used. When 3 inches of Rock Wool is placed between ceiling joists (Fig. 2), fuel bill is reduced to \$87. With further insulation of side walls (Fig. 3), fuel cost is only \$67. Figures used are taken under average conditions of climate, fuel used, method of heating and type and condition of home. Most authorities agree that an average installation will return its cost in three to four years—with new summer comfort thrown in.

How You Can Try It Out

Have you a bedroom or bathroom that is hard to heat, or gets unduly hot in the summer time? If so, install Rock Wool in the walls and over the ceiling and see what an amazing difference it makes! Many customers buy a few bags or cartons of Rock Wool each pay day and install it themselves until the job is completed. This gradual spending is not noticed—but you'll notice improved living conditions immediately.

The Cost Is Low

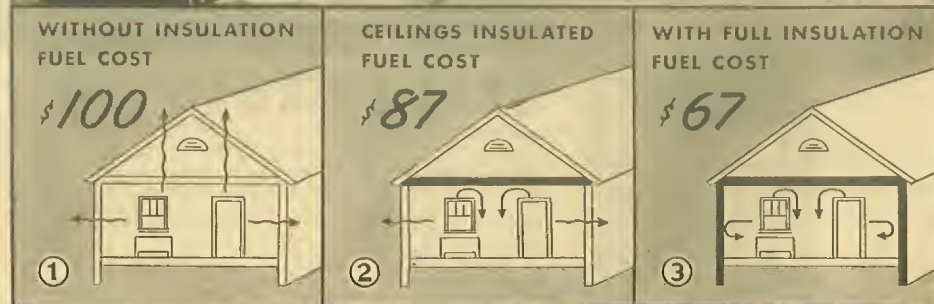

Sears Rock Wool is not expensive. You can insulate a 24x30-ft. attic, for instance, with "Pellet" Type Rock Wool 3 in. deep for only \$38. 2-inch Batts would cost you \$27.60 and 3-inch Batts \$35.28. Each form of Rock Wool is equally effective so far as insulating value is concerned. "Pellet" type is about the easiest to handle—it is easily poured from the carton between floor joists (see illustration) or into wall openings between studs. The Waterproofed Batts are fastened between upright studs as indicated. "Loose" type (not illustrated) is usually used only for stuffing into place where it is not possible to use "Pellet" or "Batt" type Rock Wool. It can't be poured, as it is in mass form.

Easy Payments or F. H. A. Plan

You can use our Easy Payment Plan as described on Page 5. Read also about the F.H.A. Financing Plan explained on Page 989.

Convenient Shipping Points

Shipped from Chicago, Cincinnati or Wabash, Ind., Philadelphia, Boston or Plainfield, N. J., whichever is nearest. Order from your Mail Order House. For freight rates, see Page E in back of catalog.

OFFERED IN THREE CONVENIENT TYPES

NEW WATERPROOFED BATTS

LESS THAN

4¢

A strong, heavy layer of moisture-proof paper is firmly cemented with asphalt to the Rock Wool batt. The batt itself is 15x23 inches and the waterproof paper measures 19x27 inches, which leaves a 2-inch overlap on all four sides. Choice of two thicknesses.

48 LM 3218—3-Inch-Thick Waterproof Sq. Ft., 2-In. Paper-Backed Batts. Size, 15x23x3 in. Each carton of 8 batts will insulate about 20 sq. ft. of surface. Per carton. Shpg. wt., 28 lbs. . . . \$98c

48 LM 3216—2-Inch-Thick Waterproof Paper-Backed Batts. Size, 15x23x2 inches. Each carton of 12 batts will insulate 31 sq. ft. of surface. Not quite as efficient as our 3-inch batts, which we recommend but suitable for many uses. Per carton. Shpg. wt., 30 lbs. . . . \$1.15

LOOSE TYPE

This form of Rock Wool is equally as efficient as the "batt" type, but comes in mass form, easily pulled apart, for stuffing into any space. It cannot be poured. Comes in bags containing enough Rock Wool to insulate 18 square feet of surface to depth of 3 inches. Shipping weight, 36 pounds.

48 LM 3210 — Per Bag. 4 Cubic Ft. . . . \$78c

PELLET TYPE

This form of Rock Wool consists of fluffy wool-like fibers in "pellet" form, easily poured from carton (see illustration at top of page). Same material as used by contractors using "blowing" equipment. One carton will insulate 18 square feet of surface 3 inches deep. Shipping weight, 37 pounds.

48 LM 3208 Per Carton, 4 Cubic Ft. . . . \$95c

SEARS INSULATION WILL MAKE YOUR HOME COMFORTABLE AND HAPPIER

"BEST-OF-ALL" ALUMINUM INSULATION

Sears "Best-of-All" Aluminum Insulation turns back heat by reflective principle—much as a mirror reflects light. It's the lightest weight, lowest cost insulation on the market. Thermal conductivity rating is 0.30. Used by makers of electric ranges, locomotives, streamlined trains, refrigerators and many others.

Made of heavy Kraft paper covered on both sides with aluminum foil. Should be backed up with at least 2 in. dead air space for best results. Can't deteriorate. Rolls, 33 in. wide.

48 LM 3212—Aluminum Foil on Plain Kraft Paper. Per 250 sq. ft. roll. Shipping weight, 14 pounds. . . . \$7.45

48 LM 3214—Aluminum Foil on strong, jute-reinforced Kraft. Per 250 sq. ft. roll. Shipping weight, 16 lbs. . . . \$9.45

Easily poured between ceiling joists or wall studs. Bag contains enough material to insulate 24 sq. ft. 2 in. deep; 16 sq. ft. 3 in. deep; or 13½ sq. ft. 3½ in. deep. Wt., 24 lbs. Shipped from Chicago, Philadelphia, Boston or Long Island City, N. Y. Order from your Mail Order House.

48 LM 3206—Per Bag. . . . \$93c

MINERAL FILL INSULATION

These fluffy pellets of genuine expanded mica are honeycombed with millions of tiny trapped air cells, forming a definite barrier against heat, cold or moisture. Our Mineral Fill Insulation has a thermal conductivity of 0.28 BTU's per inch of thickness, is fireproof, dust-proof and will not deteriorate. Installation is permanent. It will quickly pay for itself in fuel savings, as well as provide cooler rooms in the summer.

FOR EXTERIOR USE

"SEALTITE" Sheathing Board insulates as it builds. Moisture-resistant. Completely sealed with asphalt. Replaces wood sheathing. Makes stronger and tighter walls. Large wide sheets, easier and faster to apply. Cuts labor costs. Stops heat losses. Adds summer comfort. Reduces outside noises. Sears low prices make it the logical sheathing to buy.

FOR INTERIOR USE

Lines and insulates attics—makes useful, "livable" rooms. Siplap size, the ideal and economical plaster base. As a sub-flooring, it hushes the noise of heavy feet. Covers up rough masonry, giving it an improved appearance.

ONLY 4³/₄c SEALTITE SHEATHING BOARD

OUR OWN TRADE MARK

- Made of selected, chemically-treated fibers, compressed into a strong, rigid and non-splitting sheet 25/32-in. thick. Handles as easily as lumber.
- Entirely coated with asphalt, making it effectively moisture and rot-resisting.
- Thermal conductivity is only 0.34 per inch of thickness—resists heat passage—keeps out cold, too.
- A marvelous insulating material—cuts fuel bills and make the home more comfortable in summer—an investment that pays for itself in a short time.
- Used extensively in place of wood sheathing—has strength and rigidity.
- Easy to apply—large sheets nail up quickly and are line marked for nailing to studs. Saves labor in application. Choice of four sizes of panels.

Why pay more than Sears low prices for highest quality, asphalt-treated, insulating sheathing board? Sears SEALTITE is all the name implies—a sheathing board completely asphalt-sealed against the destructive action of vapor, moisture and dry rot, and which in turn will shield your home or other buildings against infiltration of outside heat in summer and loss of radiated heat in winter. Each sheet is line striped for ease in stud nailing. Send for sample.

SEALTITE is offered in 48-inch width and four convenient lengths shown at right. It can be sawed and nailed as readily as lumber. See our Easy Payment Plan as de-

scribed on Page 5. SEALTITE is shipped from our Mail Order House, or warehouse in Dubuque, Ia., whichever is nearer you. Order from our Mail Order House. We cannot accept orders for less than three sheets. Prices below are per sheet. State size.

LESS THAN 3c WALLTITE INSULATING BOARD

OUR OWN TRADE MARK

- Made of selected chemically-treated fibers, formed under tremendous pressure to a sheet 1/2 or 3/8-inch thick—light in weight, yet possesses remarkable strength.
- Double duty—use both as wallboard and as insulator. Tough, fibrous, wiry, cellular structure contains millions of tiny air cells—a marvelous insulator; thermal conductivity, 0.34 per inch of thickness.

The equal of any similar product, yet it costs less at Sears. Sears WALLTITE does many important jobs at one time—insulates, strengthens, deadens sound and protects. As an insulating material, it repels the frigid blasts of winter as easily as it turns back the scorching rays of summer sun. In fact, one inch of WallTite has the insulating value of 36 in. of concrete. Ideal for lining chicken houses, hog houses, out-buildings, garages, basements, store rooms and attics. Use 1 1/2-in. blued lathing nails—see Index.

WALLTITE saws readily, holds nails tightly and can be installed quickly—no muss, no trouble. Won't sag, buckle, shrink, warp or split and is odorless. Use Panel Strips listed below over joints of sheets. Board comes in two thicknesses, 1/2 and 3/8-in. 1/2-in. size is recommended

for all general purposes as described at left and comes in choice of 5 sizes. 3/8-in. size is slightly less efficient and is offered in only three sizes. Shipped from our Mail Order House, or warehouse in Dubuque, Iowa, Cairo, Ill. or Cincinnati, whichever is nearest. Order from our Mail Order House. We cannot accept orders for less than three sheets. Prices below are per sheet. State size.

\$1.95	5 Lbs.	\$2.60	6 Lbs.	\$3.25	8 Lbs.

WALLTITE PLASTER BASE

WallTite Insulating and Plaster Base Lath does not permit "skipping." Every inch of wall and ceiling area must be completely covered, assuring the utmost in insulation. Plaster Base Lath is 1 1/2x4 feet in size, 1/2-inch thick and has ship-lapped edges. More economical than wood lath and is easier to apply. Saves on labor costs. Leaves no disfiguring lath streaks in the finished wall. Use 1 1/2-inch Blue Lath Nails—see Index. Same shipping points as insulating board above. Shipping weight, per sheet, 4 pounds. Easy Payments on Page 5.

48 LM 3205—Per 1 1/2x4-ft. sheet. 21c

Use "Cornerite" Metal Reinforcement in all corners for perfect plaster results. See Page 1031 for metal lath and other plasterer's needs.

BUY ON TERMS

No need to delay home improvements when Sears Easy Terms are so convenient. Read all about it on Page 5. See also Page 989 for F. H. A. Finance Plan.

SEARS BEST-OF-ALL WALLBOARD MAKES WASTE SPACE A LIVABLE PLACE

- Long, tough fibers, tightly compressed into 4-ply laminated sheets.
- Heavy Weight, $\frac{3}{16}$ -inch thick; or Medium Weight, $\frac{1}{8}$ -inch thick.
- Strong, durable; light weight; easy to handle. Large sheets cover surface quickly and reduce time required for application.
- Needs no painting though it can be sized and painted if necessary. Comes tinted.

Sears "Best-of-All" Fiber Wallboard is so widely used it needs no introduction. Its popularity is well deserved—it makes drab, worn walls radiate new life and beauty—transforms attic, spare room or closet into rooms as modern and attractive as any in the house for less than $2\frac{1}{2}$ ¢ per sq. ft.

"Best-of-All" Wallboard has literally hundreds of uses—for ceiling or paneling rooms, closets, porches, attics, basements, store rooms, out-buildings, garages, etc.; also for shelves, bins, partitions and many other purposes. Deadens sound. Joints between panels should be covered with either the gummed tape or wood panel strips listed below. We do not recommend using wallpaper over wallboard.

Choice of Two Grades—Two Colors **Heavy Weight**, our best grade, is $\frac{3}{16}$ -in. thick, tinted Tan 638 on one side and Cream on the other. **Medium Weight** grade is $\frac{1}{8}$ -in. thick, tinted Green 307 on one side and Cream on the other. Numbers after colors refer to Color-Graph, facing first Index page in back of book; shows actual color reproductions. We recommend Heavy Weight grade for best results. Use 1 lb. of 1-in. or $1\frac{1}{4}$ -in. fine lath or galvanized shingle nails per 200 sq. ft. See Index. **Wallboard, Panel Strips and Joint Tape shipped from Mail Order House or factory in Buffalo, whichever is nearer. Order from your Mail Order House.**

WATERPROOFING ASPHALT Keeps Out Moisture and Rot

When applied to outside foundation walls during construction, it prevents moisture penetration and keeps basements dry and healthful at all times.

To keep tanks and other steel items from the ravages of rust and corrosion, SEROCO Asphalt is ideal. Simply spread with a brush.

Fence Posts dipped in SEROCO Waterproofing Asphalt last considerably longer than untreated posts. Simply dip ends as shown in illustration above.

Use it on sloping or flat roofs over our Asphalt Saturated Felt 48 LM 3009 or 48 LM 3010 shown on Page 1010 of this catalog. Notice ease of application.

Brought to you in new convenient paper bag form and at a money-saving low price. Foundation walls should be coated with Seroco Asphalt to insure moisture-proof cellars. Basements become damp and unhealthful when not properly protected against the seepage of ground water. This material fills up the "pores" of foundation walls and helps keep basement as dry as rooms above. Also used to caulk boats, fill cracks in concrete, etc. Comes in solid form. Must be heated in seamless container. Apply with short or long handle brush. Bags shipped from Philadelphia, Boston or Kearny, N. J. Drum shipped from Kearny only. Order from your Mail Order House.

FREE ESTIMATES

We will be glad to estimate your needs for you. Simply send us a list of all the items you need to rebuild, repair, make alterations or modernize your home, barn or any building for which you or your architect have prepared plans. We will give you a price delivered-to-your-station on all materials. There is no charge or obligation for this service.

MODERNIZE UNDER NEW F. H. A. PLAN

Remember, if your order for Modernizing materials is over \$100, you may purchase them under the F. H. A. Finance Plan described on Page 989. Under this plan you send no money—the first payment is a month after you have received the material. You can suit your own convenience as to the amount of time you want. Take any number of months up to 36. No need to bother your friends; no endorsers are needed; just your own signature. Low rates; the financing charge saves you money. Remodeling or complete repair is an inspiration and an investment. It gives you a "new" house, modern in appearance and improved in facilities for gracious living. Take advantage of this convenient plan now.

COPPER-BEARING STEEL OR COPPER GUTTERING

FOR LONGER LIFE • GREATER SATISFACTION • EXTRA VALUE

WITH HANDY PATENT SLIP CONNECTIONS

Circle at right shows two pieces of eaves trough about to be joined with Sear's Solderless Slip Connector

With Slip Connectors it's easy to join trough together

Eliminates need of ordering right or left hand pieces

Gives a non-sag, water-proof tight joint

Cross-section of Sear's corrugated rainpipe, showing the special locking process which insures tight, closed seams that can't leak.

F.H.A. See details of Plan on Page 989.

Choice of Long-Life Galvanized Steel or Lifetime Copper

Sear's steel rainpipe and eaves trough are made from First Quality "Copper-Bearing" sheet steel—the steel that resists corrosion and lasts twice as long as ordinary steel not having this valuable copper content. We dip this steel in white hot molten zinc to give it a heavy galvanized coating for extra protection against weather and rust. There is no finer guttering of this type to be had, regardless of price. We furnish 26-gauge and 28-gauge weights. However, the 26-gauge weight is recommended because it is 20% thicker than 28-gauge and will last considerably longer. It is well worth the small difference in price. Lifetime 16-oz. Cold Rolled copper rainpipe, eaves trough and fittings are also priced below. We recommend copper because it is a lifetime

(A) EAVES TROUGH "Copper-Bearing" 26 or 28-gauge galvanized steel, also 16-oz. Copper. 10-ft. lengths. We recommend 5 and 6-inch for houses; 3½ and 4-inch for garages. State size. Average shipping weight, per length, 28-gauge, 7 pounds; 26-gauge, 10 pounds, copper, 8 pounds.

material with no maintenance cost—the only guttering that should be used in seashore regions.

All our eaves trough, steel and copper, supplied with Patented Slip Connector. This handy device eliminates use of solder and necessity of ordering right and left hand pieces of eaves trough. Slips on to either end of trough making a permanent, non-sag, waterproof, solderless joint. Circles 1, 2 and 3 show how they operate. Corners, outlets and end caps also have slip-connector feature.

(H) RAINPIPE "Copper-Bearing" 26 or 28-ga. galvanized steel, also 16-oz. pure Cold Rolled Copper. Comes in 10-ft. lengths. One end crimped for easy fit. For 3½ or 4-in. eaves trough order 2-in.; for 5-in. order 3-in.; for 6-in. order 4-in. pipe and fittings. Shpg. wt., each length, 28-ga. 6 lbs. 8 oz.; 26-ga., 7 lbs. 8 oz. and copper, 7 lbs. State size.

EAVES TROUGH SHANKS AND CIRCLES

These rigid hangers will anchor your eaves trough so securely it cannot be loosened. Will withstand severe windstorms and prevent damage to eaves trough on account of heavy snow and ice. Hanger consists of a circle (N) which is firmly bolted to a shank (P, R or S). Holes punched in shanks and circles permit a variety of adjustments to fit most rafter angles. Illustrations T, U and V show how shanks and circles are joined together to form complete hanger unit. We furnish all necessary bolts for fastening parts together. One shank and one circle needed for each 5 feet of trough. Specify size of trough. Average shipping weight, of each complete unit, 6 oz.

Tinned for Galv. Trough	Price Each	Description	Bronze for Copper Trough	Price Each

48 LM 3162	9c	Shank (S) For ¼ or ½ Pitch Rafters	48 LM 3245	25c

GALVANIZED STEEL OR COPPER BOX-TYPE GUTTERING AND FITTINGS

We Recommend Copper—The Lifetime Material

This square bead box eaves trough and fittings combines decorative appearance with extra strength and durability. For Atlantic seaboard territory we recommend our 16-ounce Cold Rolled Copper as it is not affected by salt air, lasts a lifetime and is well worth the difference in price. Never needs painting. Anything lighter than 16 ounce copper will not give you the service you expect. Our galvanized eaves trough is made of 26-gauge "Copper-Bearing" steel. In hanging this type of guttering all joints must be soldered. Allow 2½ inches for each lap when ordering. See prices at right. All items available except eaves trough and rainpipe.

SIZES: Trough width at top, 4½ inches; bottom width, copper, 2½ inches; galvanized, 3 inches; depth 3½ inches; all rain pipe and fittings are 2x3 inches. Modernizing is easy at Sears. You may buy guttering on our Easy Payment Plan described on Page 5 of this Catalog or F.H.A. Financing Plan explained on Page 989.

STEEL ROOFING

CORRUGATED ROOFING

- Made of First Quality, Full Gauge Prime Steel. • Heavily coated with 1 1/4-oz. of hot zinc per square foot on both sides and all four edges. Insist on 1 1/4-oz. coated steel.

The name ALL-WEATHER on corrugated steel sheets is like STERLING on silver—the highest known quality. By the same token it's the lowest priced roofing or siding, per year of service, that you can buy. Naturally, it conforms to all codes and meets U. S. Bureau of Standards Specifications. Reduces fire insurance rates because, properly grounded, it renders lightning harmless. Flying sparks sputter out without damage. Doesn't curl up, buckle, crack or dry out under heat or cold; can't be pried loose by winds. ALL-WEATHER Steel Roofing and Siding is easy to apply—a hammer and tinners' snips are the only tools you need.

Choice of Two Gauges

28-gauge Galvanized Steel is recommended for use in ordinary climates. The 26-gauge is about 20% heavier than 28-gauge and will give the best service—particularly in damp and salt air climates. All corrugated sheets 26 in. wide and with 2-in. side lap, actually cover 24 in. Allow 6 in. for end laps when used as roofing—2 in. is sufficient when used as siding. Painted steel is only prime coated and must be painted again before using. For steel roofing we recommend only lead headed nails priced on opposite page. See shipping weights at bottom of page at right—For Easy Terms, See Page 5.

SOLD ON EASY TERMS

Sears Finest Quality Corrugated Steel—2-Oz. Pure Zinc Coated

- Bears Zinc Institute Seal of Quality.
- First Quality, Full Gauge Prime Steel Sheets.
- Coated with 2 ounces of pure zinc (1 oz. per square foot on each side)—gives exceptionally long service. The finest steel roofing sheet made.

For those who want the finest known quality, we offer Corrugated Steel Roofing with extra heavy 2-ounce zinc galvanized coating—almost twice the thickness of galvanized used on ordinary steel. This means a sheet that gives double the service of ordinary steel—is able to serve under any and all conditions. For this super-quality steel you pay only a few cents more per sheet—but it is well worth this small difference.

Choice of Two Corrugations and Six Lengths

Sheets are 26 inches wide and cover 24 inches in width with 2-inch allowance for lap. Allow 6 inches for end lap. See shipping weights at right. For Easy Terms, See Page 5.

Cannot rust. Ideal for chimney flashing or valleys, drain-boards, table tops, tanks and countless household uses. Shipping weight, 16 pounds. Shipped from Philadelphia.

48 LM 3233—Cold rolled 16-ounce copper sheets. Size, 24x96 inches. Per sheet.....\$6.45

HOW TO ORDER STEEL ROOFING

Shed Type. Fig. 1. Measure length of roof (A) and divide by 2. (Sheets actually cover 2 ft. in width.) This gives number of sheets to order. Length of sheets is determined by distance (B). If roof is 30 ft. long at (A) and 12 ft. from ridge to eaves at (B), you need: 30 ft. divided by 2 or 15 sheets of 12-ft. steel for the roof.

Gable Type. Fig. 2. Follow same procedure as above and multiply by 2 to find number of sheets required for both sides of roof.

Cambrel Type. Fig. 3. Divide length (A) by 2 to determine number of sheets required. Distance (B) indicates length of sheets for this section. Add 6 in. to distance (B) for projection over section below. Distance (C) indicates length of sheets required for lower section. Allow 6 in. for end lap. Multiply result by 2 to find number of sheets required for both sides of roof.

If you are unable to determine amount of roofing needed, send for Estimate Blank P6089L, indicate measurements in space provided, and we'll estimate your needs for you, delivered to your station. This service is free.

SHIPPING WEIGHTS

Approximate shpg. wt. per running foot of all steel roofing and siding.

Gauge	Finish	Wt. Per Foot
29	Galvanized	1 lb. 12 oz.
28	Painted	1 lb. 8 oz.
28	Galvanized	2 lbs.
26	Galvanized	2 lbs. 4 oz.

EXAMPLE: 10-foot sheet of 28-gauge galvanized steel weighs 2 lbs. per running foot, total weight, 20 lbs.

MANY WAREHOUSE SHIPPING POINTS

Sears warehouse shipping service is unsurpassed. One of our many shipping points is near you, to save you freight. Only another reason why you should buy all your roofing needs from Sears.

View at left shows exclusive non-syphoning drain feature used on our patented leak-proof steel roofing. Large oversize drain channel positively prevents seepage—stops water from getting to under side of roofing.

CRIMPED ROOFING

- Made of exactly the same high quality materials as ALL-WEATHER Corrugated Roofing on opposite page.
 - Choice of 2-V or 3-V; also 5-V Leakproof type.
 - All sheets 24 inches wide, and in lengths shown below.
- ALL-WEATHER V-Crimp Roofing and Siding gives barns and other buildings a substantial appearance and an atmosphere of permanence. In addition to lowest known prices for material of this character, Sears give you First Quality—Full Gauge—Full Weight and Super Galvanizing. Strength, security and saving unsurpassed by any other material. Properly painted, it will last indefinitely. All sheets actually cover 24 in. in width; allowing for crimp or overlap. Allow 6 in. for end lap when used as roofing; 2 in. if used as siding. All painted sheets must be given another coat before using.

Sears Patented Leak-Proof Steel Roofing

See detailed view above. The finest leakproof feature on the market. Water cannot get to the under side of roofing by capillary attraction. It runs off through the large drain channel. Offered at prices usually asked for just ordinary roofing. Leak-proof V-crimp steel roofing is shipped from warehouse in Philadelphia, Boston or Cincinnati; 2 and 3-V steel shipped from same points as corrugated roofing on opposite page. Send orders to Philadelphia. See shipping weights on opposite page. Easy Payments if you wish—see Page 5.

YOUR BEST PROTECTION AGAINST LIGHTNING... MAY BE BOUGHT ON EASY TERMS SEE PAGE 5

SEARS LIGHTNING RODS WILL PROTECT YOUR BUILDINGS

Why risk farm or home property when it can be cheaply protected by Sears Lightning Rod equipment? Lightning destroys \$20,000,000 worth of farm property yearly—yours may be next if left unprotected! For a small sum Sears Lightning Rods will give you **SECURITY and COMFORT.**

Sears cable meets Underwriters' Specifications. We use 17-ga. pure copper wire cables in choice of 3 sizes. For average size homes and buildings, use 32-wire cable. For larger buildings or where storms are severe, use heavier cable. Uprights "A" and "B" are 20-ga. seamless copper tubes, pointed at top and rigidly supported by heavy galvanized standards. Upright "C" is pointed 20-ga. seamless copper tube with copper saddle. We furnish cable fastener and 2 nails with every 3 feet of cable. Vanes and glass balls are for decorative purposes only.

INSTALLED ROD SERVICE

Sears Lightning Rod equipment will protect your buildings, but to secure reduced insurance rates, let Sears arrange your installation by approved installers. This insures complete and correct lightning protection. Such installation also bears the Underwriters' label, which secures for you the highest rate credits from your insurance company. Complete installation is ordinarily made within two weeks and always within thirty days, weather permitting. Write Sears, Roebuck and Co., Dept. 48, giving all measurements as per instructions below. We will then send you a complete estimate. You may, of course, install your equipment yourself, as per our printed instructions, but in that event you would not receive Underwriters' approval.

Shown at left is a lightning rod composed of Plain Top 48 LM 3688 fitted with Aluminum Arrow Vane 48 LM 3691 and Glass Ball 48 LM 3692. Cost as shown is only \$1.90. Many other combinations are possible.

 (L) 48 L 3701—Cable Splicer. Made of Solid Copper. Shpg. wt., 4 oz. ... 15c

HOW TO ORDER

Measure with a tape line or a piece of non-stretch cord, along lines, shown in illustration. Ten ft. of cable should be sunk in ground at each place where rods are grounded. Set tops not more than 20 ft. apart along roof ridges; and within 2 ft. of ridge ends. Allow one each for chimneys, cupolas and other elevations.

Every building requires at least two grounds; gabled buildings and "T" or "L" shaped buildings require three or more, depending on size.

Send for Free Folder 12024L

Gives complete instructions on how to make installations on various buildings. Write to Sears Personal Service Department for a copy.

CONTRACTORS! BUILDERS! SAVE HERE ON PLASTERING NEEDS

ELLIPTIC DESIGN

GOthic DESIGN
48 LM33—48 LM44

CIRCLE DESIGN
48 LM11—48 LM22

READY-FORMED METAL PLASTERING ARCHES

Sears Ready-Formed Metal Arches are economical. That's because they provide in a single unit the three essentials of a true arch: plastering base, plaster ground and corner bead. They eliminate expensive and difficult operations. They save you the expense of constructing curved wood forms and the cost of forming corner beads. Experience has shown that Sears Ready-Formed Metal Arches save you half the time and expense of building arches the old way.

CHOICE OF THREE STYLES

Sears Ready-Formed Metal Arches have a wide range of adaptability. They provide the three designs most freely used for plastering arched openings: True Circle, Gothic and Elliptic. They are made standard for the 2x4 studs, but if your studs are 2x6 or 2x8, we can supply arches to accommodate those, too (see below). They come in 6 standard sizes, but can be adapted to nearly all sizes and types of openings by combinations of standard unit sections. The adaptability of these arches makes them suitable for either new or old buildings. Ideal for telephone niches, bookcase niches, arched wall recesses, etc. Circle design arches can be supplied for 2x6 or 2x8-in. studs for \$1.25 extra; Gothic for \$1.50 extra; Elliptic for \$1.75 extra. State stud size.

Catalog Number	Design	Size Opening	Stud Separation	Shpg. Wt.	Pieces in Set	Price Per Set
48 LM 11	Circle, 10 -in. Radius	20-in.	21 1/2-inch	5 lbs.	2	\$2.25

48 LM 66	Elliptic	72-in.	75-inch	9 lbs.	4	3.85

All plastering materials shipped from Milwaukee, La Crosse, Wisc., Canton, Ohio, Philadelphia or Boston, whichever is nearer. Order from your Mail Order House.

DIAMOND MESH METAL PLASTER BASE

A base and reinforcement for plain and ornamental plastering stucco and fire-proofing. Use under tile and for rat-proofing. Gives quick coverage.

Made in four weights. Priced and sold by the 20 sq. yd. bundle of 10 sheets, size 27x96 in. Use painted lath for inside plastering. Use galvanized lath for stucco and outside work. We recommend heavy weight lath for all work.

Catalog Number	Prices are for 10-sheet Bundle	Weight Sq. Yd.	Wt. Per 10 Sheet Bundle	Price
48 LM 2844	Painted Black	2.2 lbs.	44 lbs.	\$3.70
48 LM 2845	Painted Black	3.0 lbs.	60 lbs.	4.45
48 LM 2846	Galvanized	2.5 lbs.	50 lbs.	4.55
48 LM 2847	Galvanized	3.4 lbs.	68 lbs.	4.85

METAL LATH CORNERS

Made from our diamond mesh metal lath. Used (as shown above) in inside corners of room lathed with wood lath, insulating board, plaster board, etc. to prevent unsightly corner cracks. Listed by Underwriters' Laboratories, Incorporated. Every square inch of Cornerite reinforces because it's all expanded metal—no smooth surfaces to which plaster will not stick. Size of each piece, 3 inches by 3 inches by 8 feet long. Painted black. Packed in bundles containing 25 pieces or 200 lineal feet. Shipping weight, 26 pounds per bundle.

48 LM 72—Bundle Cornerite. \$3.65

26-GAUGE STEEL CORNER BEADS

(A) Expansion Style. For "outside" corners. Has 2 1/2-in. flange of metal lath. Wide flange facilitates construction on irregular corners. Made of 26-ga. steel, heavily galvanized. Sold only in full bundles of 10 pieces, in lengths below. Bundles contain 60, 80 and 100 lineal feet respectively. Shpg. wt. per lineal ft., 8 oz.

(B) Standard Style. Made of 26-gauge galvanized steel. Insures neat corner construction and prevents plaster chipping at corners. Meets all building requirements. Provides an absolutely straight corner. Every bead is thoroughly inspected before shipping. Nail holes are provided in flanges to speed up erection. Perforations in flanges provide a key for plaster. Perforated flanges 1 1/2 inches wide. Shipped only in full bundles of 10 pieces in lengths indicated below. Shpg. wt. per lineal ft., 4 oz.

Catalog Number	Length of Bead	Per Bundle

48 LM 90	10 foot	100 lineal ft.	2.35

SEARS STEEL SASH WILL NOT WARP

\$198
And Up

Can't Warp or Lose Its Shape

There **IS** a difference in steel cellar sash, and when you compare Sears Welded Steel Cellar Sash with other sash that is merely "shaped" you will know why we say this is the finest made. Shown at left are six of its more prominent features—all contributing to strength, convenience, longer wear and greater satisfaction. Because of its strong welded construction and heavier steel it will never warp or lose shape. It's weatherproof, too, because of the cork cushion bedding strips around each pane of glass. Sash is easily tilted open or lifted out from inside for ventilation. Prices in table below are for sash and frame as shown. Glass and putty not included.

Write for prices of storm sash and screens to fit these sash

"TRIUMPH" CONCRETE MIXERS

\$1895
And Up

Sears TRIUMPH Mixers are especially designed and built for farm needs. They thoroughly mix concrete, mortar or plaster, wet or dry. The small size makes especially good feed mixer. They are adaptable to almost any kind of power. Operates best at an engine speed of 150 revolutions per minute. Pulley for belt drive as shown. Equipped with handle for manual operation.

Here are some of the many jobs you can do with the TRIUMPH: Foundations for buildings, feed floors, feed troughs, water troughs, sidewalks, culverts, fence posts, roadways, fruit and vegetable cellars, porches, etc. These jobs enable the mixers to pay for themselves many times over.

Choice of 2 Sizes

The 1 1/2 to 2 cubic feet capacity and the 3 to 4 cubic feet capacity.

Mixers are ruggedly built. Strong angle iron frames are solidly braced. Drums tilt either way and are made of 16-gauge steel with bowl and head of heavy cast iron. Paddles are solidly constructed and rigidly braced to do a thor-

ough mixing job. For belt power the TRIUMPH has a cast iron pulley with 3-inch face. Small size has 12-inch pulley, large size has 16-inch pulley. Pinion drives are enclosed, a feature that minimizes wear and prevents damage. Equipped with practical dump locking device. General dimensions: Length, 50 in.; width, 38 in.; ht., 54 in.; shoveling ht., 35 in.

You can buy building materials on Sears Easy Payments. See complete details on Page 5.

Shipped from factory in Fredricktown, Ohio, and you pay freight from there. Order from your Mail Order House.

STEEL COAL CHUTE

\$398 This sturdy coal chute meets the demands of our customers who want quality that will give longest possible service and still be reasonably priced. It is made of extra heavy rolled steel. All working parts are Parkerized—a process that makes them resist rust and protects the paint film. All hinges and joints are electrically-welded for added strength. When door is closed, it locks automatically and can be opened only from the inside. Wall opening size is about 23x17 in. Chute proper extends into wall 8 in.

BUY ON TERMS

Buy your concrete machinery and building materials, everything on Easy Terms. Pay by the month. See Page 5 for full information.

"WIZARD" Concrete Block Machine

\$3295

Wizard Concrete Block Machines are fine sturdy quality, and tried scientific construction. They are the fruit of our 30 years experience in buying and selling block machines. This Machine makes 8x8x16-inch blocks face down in medium Rock Face Design. Enables you to make blocks at lowest cost. With each machine we include Rock Design face plate for whole blocks, Rock Design face plate for making one half and two quarter blocks; two Rock Design end gates, two core end gates, two dividing plates, one gable block dividing plate for making gable blocks; two joist block attachments, plugs for closing core holes to make solid blocks, one striker tool, one double

end tamper, and one sample wood pallet for a pattern.

This machine is a "three-core" type, which makes an economical block as it takes less material on account of greater core area than in two-core machines. The cost of making blocks with this three-core machine is less, and the greater hollow space provides greater insulation. Two men can make from 100 to 125 blocks a day on this machine. Shipping weight, 185 pounds. Shipped from factory in Fredricktown, Ohio. Order from your Mail Order House.

63 LM 5730—Complete as shown.\$32.95

"TRIUMPH" CONCRETE BLOCK MACHINE

Complete
\$5295

Unmatched in Performance. It has a capacity of 200 to 250 blocks per day with two men. A great saver of labor costs. Ideal for the farmer or small contractor. Makes face-down block and uses a wood pallet for economy. Cores are lever drawn. Simple and easy to operate. Built-on facing table. Equipment includes: face plates in medium rock-face design for whole, half and quarter blocks, 2 rock and 2 core end gates, 2 dividing plates, 2 joist block attachments, 3 core plugs, 1 striker, 1 double end tamper, 1 sample wood pallet and 1 gable block dividing plate. Mounted on substantial, heavy stand. Makes 8x8x16-inch blocks.

Easy Terms. Why not buy the TRIUMPH Block Machine on our convenient Easy Payment Plan, as described on Page 5? It's the convenient, practical way to buy merchandise. Costs only a small amount down...a little each month. Pays for itself in the months to come. Shipped from factory in Fredricktown, Ohio. Order from your Mail Order House. Shipping weight, 275 pounds.

Sears-Tyle BOARD FOR WALLS—LOOKS AND CLEANS LIKE TILE

16c

And Up
Per Sq. Ft.

- Illustrated in actual beautiful colors on opposite page
- Hard, rigid panels, 1/8-inch thick: choice of 3 sizes
- Overlaid with a brightly enameled, glass-smooth surface in choice of appealing colors
- Choice of two surface finishes, GLISTO (glossy) and VELVO (soft) finish, each scored in 4x4-inch tile pattern, also STREAMLINE (glossy) panels for upper walls, with horizontal score lines 8 inches apart

Modernize your bathroom—dress up your kitchen with the new tile-like wallboard that transforms old, drab walls into surfaces of surpassing beauty. SEARS-TYLE Board looks like tile, cleans as easily as tile, resists hot water and stains and can't be penetrated by dirt, grease, vermin or boring insects. Will not chip, crack or peel. Easy to install. Apply large panels, edge them with chromium strips shown at bottom of page, then finish off with cap and base molding and the job is done. We furnish simple instructions. You'll have a room you'll feel proud of, and its sanitary, gleaming brightness will be a delight to you and yours for years to come.

Choice of GLISTO (Glossy) or VELVO (Soft) Finish

GLISTO Sears-Tyle Board has a glossy, highly polished and reflective surface and is recommended for bathrooms and kitchens; also for restaurants, tea rooms, display rooms, barber shops, beauty parlors, hospitals and many others. VELVO Sears-Tyle Board has a velvety, unpolished finish and is recommended for basements, recreation rooms or laboratories where a lower priced, yet serviceable board is desired. Our new STREAMLINE Sears-Tyle Board has the glossy finish with horizontal score lines 8 inches apart. It is used principally for upper walls as shown on opposite page.

There's a Color for Every Decorative Scheme

GLISTO Sears-Tyle Board comes in White, Black, Orchid, Ivory and Green (see actual colors on opposite page). White panels have black or gray score lines; Ivory panels have black score lines; all others have white score lines. VELVO Sears-Tyle Board comes in White, Green 305, Cream and Blue 216. Numbers refer to Sears Color-Graph facing first index page in back of catalog. White panels have black score lines; all others have white score lines. STREAMLINE Sears-Tyle Board comes only in Ivory, Green and White, and the horizontal score lines are the same color as the surface of the board. Actual colors shown on bottom of opposite page.

IMPORTANT: Be sure to state color when ordering.

Size of Panel	Sq. Ft. per Panel	Shpg. Wt. Pounds	GLISTO Panels 63 LM 6578	VELVO Panels 63 LM 6580	STREAMLINE Panels 63 LM 6577

Sears-Tyle Board Is Easy to Install

Sears-Tyle Board can be sawed, nailed and planed like lumber. Won't crack or split. Covers any kind of old or new wall surface. Fastens by cement (and nails) over rock lath or plaster board. Nail holes filled with black or white putty to match score lines. Nails and putty listed above. Instructions included.

Sears-Tex RUBBER TILE FLOORING FOR BEAUTY—LONGER WEAR

30c

Per Square Foot

- Illustrated in actual colors on opposite page
- Comes in 6-inch squares: thickness, 1/8-inch
- Handsomeness "marbled" patterns in choice of 5 colors
- Permits "checkerboard" design by using alternate squares of harmonizing colors, or single color if desired.
- You can install it quickly and easily over new or old floors—we furnish simple directions
- Cleans readily—softens footsteps—will always look new—lasts indefinitely

Floors take the most punishment in any room, but when covered with Sears-Tex Rubber Tile Flooring, they come up smiling every time. Here's flooring that can really "take it"—and years from now it will look as fresh, bright and new as when you first laid it. The beautiful, "inlaid" coloring goes clear through to the base. Being made of resilient, live, specially compounded rubber, of a texture similar to the tread of an auto tire, it gives instead of wears—absorbing the impact of heavy feet without marring its permanent surface finish. Actual colors are shown at bottom of opposite page—White, Black, Green, Blue or Red—all with "marbled" or mottled inlaid pattern. State color.

HOW TO ORDER. Find area of room and determine number of square feet to order. Example: If room is 8x10 feet you will need 80 square feet of flooring for a solid color. If checkerboard design is wanted, you will need 40 square feet of each color, using alternate squares. Note: Each sq. ft. contains four 6x6-in. rubber "tiles."

EASY TO INSTALL. Lay individual tile with mottled grain running in opposite directions. Floor should be smooth and level, to which is cemented a layer of our Saturated Asphalt Felt, 48 LM 3010, listed on Page 1010. Cement felt to floor with our Linoleum Paste 37 L 83, listed on Page 573. The tile is installed over the felt with Waterproof Cement 63 LM 1023. Order this item from listing below. Complete, simple, detailed instructions included with every order.

New Sears-Tex Rubber Tile Flooring

1 gallon	12 pounds	3.35		

NOW one coat covers ANY painted surface. Beautifies anything—walls, woodwork, furniture—any surface—wood, metal or concrete. Use it indoors—use it outdoors, anywhere, on porch or lawn furniture, automobiles, trucks. Quart covers up to 150 square feet or 4 chairs, a table and a kitchen cabinet.

Like a fairy's magic touch, a swish of the brush and the most amazing transformation takes place right before your eyes. Dull pieces brightened—faded surfaces made vibrant with new life—gay color. You may never have used a paint brush, yet with this enamel you become a master artist and no old color will show through to spoil the job.

This 4-Hour magic enamel is actually fascinating to apply! There's no trick technique to remember—just clean the surface—open the can and brush it on. Then watch the old, drab surface brighten up like a ray of sunshine. No laps, no brush marks—just a smooth, porcelain-like finish, easy to wash without dulling the luster. Users call it America's No. 1, 4-Hour Enamel because it holds its color, retains its gloss and wears longer than much higher priced enamels. Sets in one hour—dries ready for use in four. Will not chip, peel, crack or blister. Fruit juices, vinegar, grease, hot or cold water, oils or perfume will not harm it.

DECALCOMANIA TRANSFERS

23¢ Set
Give extra beauty, decoration and interest to walls, chairs, tables, stools, dressers, kitchen cabinets, canister sets, toys, wagons, baby cribs, etc. Decals have so many uses and are so much fun to apply. They give a finishing touch to your 4-Hour or Decorative Enamel job. Simply dip in water and apply. No glue or varnish needed. Sold in sheets 6x8 1/2 in., each containing matched sets of both large and small transfers. Designs 30L68, 30L69 and 30L67 (left to right) are partially illustrated above, about 1/2 actual size. Write to Sears Personal Service Dept. for free color circular D130L. Shpg. wt., each, 2 oz.

12-MESH BLACK GIVES GOOD SERVICE

1 3/4c

Sq. Ft. in
100-Ft. Roll

Best quality black wire screen. Uniformly woven from full gauge hard drawn open heart steel wire. Heavy elastic black enamel finish won't crack or chip. Will give long service if painted regularly. 12-mesh is satisfactory for localities not infested with small insects. To keep out small insects, buy 16 or 18-mesh. State width.

16-MESH GALVANIZED GUARANTEED 5 YEARS

2 7/10c

Sq. Ft. in
100-Ft. Roll

The finest galvanized wire screen money can buy! It's heavier—stronger—longer-lasting! Not only galvanized after weaving with many coats of pure zinc—but IN ADDITION it is given an improved baked-on pigment enamel finish which contains an element much like nickel—highly resistant to rust. This improved finish actually gives the screen double the life of ordinary galvanized wire screen made with the ordinary enameled or lacquered finish. Pure open-heart steel wire—full gauge—drawn to U.S. Government specifications—uniformly woven. Has small openings to keep out small insect pests, gnats, and malaria carrying mosquitoes. This screen is so well made, that in addition to our standard guarantee of satisfaction, we definitely guarantee 5 full years of service in any climate. With ordinary care it will last many years longer. State width.

16-MESH BRONZE GUARANTEED 25 YEARS

6 1/2c

Sq. Ft. in
100-Ft. Roll

No more screen repairs when you use PRO-TEX Deluxe solid bronze! No more painting! No more upkeep! Absolutely rustproof. Meets all U. S. Gov't. specifications. 50% heavier than many offer at these prices. Full gauge, extra-heavy, bright, solid bronze wire—uniformly woven—covered with durable, transparent, varnish to help keep its bright finish and prevent stain. Gives double the life of ordinary bronze wire screen. Double the strength of copper wire screen. Has the strength and stiffness of steel—yet is rustproof in any kind of weather or climate. So good, we give it a definite 25-year guarantee. Gives you the lowest cost per year of service of any screen you can buy. State width.

ACTUAL MESH

14-MESH GALVANIZED

2 1/4c

Sq. Ft. in
100-Ft. Roll

Actually priced lower than many ask for plain black enameled screen! Galvanized after weaving with many coats of pure zinc PLUS an improved baked-on pigment enamel finish. Lasts twice as long as ordinary galvanized screen! If there are small insect pests in your locality use 16 or 18-mesh screen. State width wanted.

Width	Shpg. Wt., 100 Ft.	99L6814 Per Foot	99L6814 100 Feet

ATTENTION, HOME OWNERS!

Full screened windows and porches will pay you big dividends in health and comfort. Government Health Bulletin No. 1153 recommends 16-mesh screen (or finer) for protection from malaria carrying mosquitoes and other small insects. Why not have fullest protection—it costs so little by the month on Sears Easy Terms. See Page 5.

16-MESH LIGHT BRONZE

4 1/2c

Sq. Ft. in
100-Ft. Roll

Amazingly low prices! Lighter weight than our PRO-TEX Deluxe Bronze, but equals best quality offered by many others. Absolutely rust-proof. State width.

ELGIN
Chicago
DESIGN

ELGIN Chicago Design. A design of dignity. Straight simple lines—broad beveled edges. Easy to align with door edge. A favorite for remodeling and repair work. Locks have rustproof

finish. For right or left hand doors. Unless otherwise stated, sizes are: locks, $3\frac{3}{4} \times 3\frac{1}{4}$ in.; knobs, $2\frac{1}{4}$ in.; escutcheons, $7 \times 2\frac{1}{4}$ in. All sets complete with locks, keys and screws.

- (D) ELGIN Cylinder Front Door Sets.** Brass face lock, $5\frac{1}{2} \times 3\frac{1}{2}$ in. $2\frac{1}{4}$ in. brass knobs. Brass escutcheons, outside, $10\frac{1}{2} \times 2\frac{1}{4}$ in.; inside, $7 \times 2\frac{1}{4}$ in. Key operates bolts from outside. Stop in face prevents operation of outside knob when set. Thumb turn inside. 3 keys. Fits doors $1\frac{1}{2}$ to 2 in. thick. Shipping weight, 4 pounds 14 ounces.
- 9 L 5681—Dull brass finish. \$4.49
9 L 5682—Old copper finish. 4.49
- (C) ELGIN Cylinder Entrance Door Set.** Heavy brass outside handle. Length, over all, 14 in. Brass knob and rose; cast brass thumb turn inside. Cast brass lock face; lock, $5\frac{1}{2} \times 3\frac{1}{2}$ in. 3 cylinder keys. Fits doors $1\frac{1}{2}$ to 2 in. thick.
- 9 L 5683—Dull brass finish. Shpg. wt., 5 lbs. 8 oz. \$4.89
- (B) ELGIN Bit Key Store Door Set.** Reversible 3-tumbler lock, $4 \times 3\frac{1}{4}$ in. Escutcheons, $14\frac{1}{2} \times 3\frac{1}{4}$ in. 2 handles. 2 keys. Fits doors $1\frac{1}{4}$ to $2\frac{1}{4}$ in. thick.
- 9 L 5679—Dull brass finish. Shpg. wt., 5 lbs. 6 oz. \$2.65
- (A) ELGIN Cylinder Store Door Set.** Mortise lock, $4 \times 3\frac{1}{2}$ in. Brass face, with 2 brass cylinders. Brass escutcheons, $14\frac{1}{2} \times 3\frac{1}{4}$ in. One handle for each side of door. 3 keys. Fits doors $1\frac{1}{4}$ to $2\frac{1}{4}$ in. thick.
- 9 L 5684—Dull brass finish. Shpg. wt., 6 lbs. 8 oz. \$6.50
9 L 5685—As above, but chromium finish. 7.50

- (F) ELGIN French Door or Window Lock Sets.** Lock, $3\frac{3}{4} \times 2\frac{1}{4}$ in. Escutcheons, $4\frac{3}{4} \times 1\frac{1}{4}$ in.; knob, $1\frac{3}{4}$ in. Lever handle one side. Carefully finished. For doors with narrow stiles. Nickel plated key. Fits doors $1\frac{1}{2}$ to $1\frac{3}{4}$ in. thick. Shipping weight, 1 pound 6 ounces.
- 9 L 5669—Dull brass finish. 89c
9 L 5670—Old copper finish. 89c
- (E) ELGIN Bit Key Front Door Sets.** Reversible lock, $5 \times 3\frac{1}{2}$ in.; $2\frac{1}{4}$ in. knobs. KENWOOD HEAVY DUTY HAY CARRIER

- Three large 7-in. roller bearing sheaves.
- Load pulls easier; rope lasts longer.
- Double swivel, reversible.
- Quick action fork hook with automatic guard.
- Exclusive! KENWOOD fork and sling pulleys engage at any angle—even when load comes up twisted. Only the KENWOOD has this feature!

Smoothest—easiest running—lightest pulling of all hay carriers. Offers savings in time, lengthens rope life, reduces pulling power, and will give many extra years of service. It's heavier throughout. Tough malleable iron with extra weight where extra strength counts. Long wheel base distributes load over track. Uses 3/4-in., 7/8-in. or 1-in. rope. Will fit our steel track 99 LM 7932; also Milwaukee Leader Track. Shpg. wt., 52 lbs. \$11.75
 99 L 7932—With fork pulley and stop block. \$11.75
 99 LM 7931—Heavy Duty KENWOOD Carrier. Same high quality as above, but equipped with our 99 L 7910 self-locking sling pulley. Shpg. wt., 65 lbs. \$12.75

For any other information regarding parcel post matters, ask your mail carrier or your postmaster.

DISTANCE FROM PHILADELPHIA

Local Zone.. Within Philadelphia
Zones 1 and 2.. Not over 150 miles
Zone 3..... 151 to 300 miles
Zone 4..... 301 to 600 miles
Zone 8..... Canal Zone

* If you are not sure which Parcel Post Zone you are in, ask your carrier or postmaster or look at your address on the wrapper of this or any catalog we mail to you, or on the label on any package you receive from Sears. The number that appears on the line with your address, as shown in the example below, is your Parcel Post Zone.

JOHN T JONES
R 1 B 7
MADISON VA. 3

Parcel Post Service RIGHT TO YOUR MAIL BOX

FOR CONVENIENCE AND FAST SERVICE on mailable merchandise, have your order shipped Parcel Post. It will be delivered right to your mail box. In most cases you can expect to receive your merchandise about 48 hours after you mail us your order, if you live within 300 miles of our mail order house. The Parcel Post rate table, and the directions below, make it easy to use this convenient, dependable way of shipping your merchandise.

INCLUDE MONEY FOR POSTAGE with your order. We must buy stamps to pay for the postage before shipping your order. Don't worry about sending more than the correct amount—if you send too much, every cent extra will be promptly returned to you. You pay only the actual postage required for your order.

IT'S EASY TO FIGURE the postage required to ship any order. Simply figure the total weight of the articles and refer to the table of rates for the proper amount of postage to allow. In some cases the actual postage may be slightly more or less due to variations in shipping weights. In all cases, however, *you pay only the actual amount of postage.*

AFTER YOU HAVE FIGURED the total weight of your order in pounds and you know the zone in which you live, refer to the convenient parcel post rate table at the right for correct amount to include in your remittance for postage. For example, if your order adds up to 6 pounds and you live in Zone 3, the postage would be 19c. If you don't know your zone, refer to the map or see the example shown below the map. Or, your mail carrier can always tell you your zone.

PACKAGES WEIGHING UP TO 70 POUNDS can be carried by Parcel Post in all postal zones. However, Explosives, Inflammable Articles and Poisons (other than germicides, insecticides and fungicides) cannot be shipped by Parcel Post.

FREIGHT RATES ON BUILDING MATERIAL

Freight charges amount to very little compared with the substantial saving we make you on all millwork, lumber and building material of every description. We ship direct from warehouses and factories located conveniently near you to save you time and money. You get the benefit of lower prices on these items due to savings in handling costs, and in many cases you save considerable on transportation charges because of the shorter shipping distance.

Send Us Your List for Estimate

It's easy to figure what the shipping charges on any millwork order would be from the tables below, but, if you prefer, send us a list of your requirements and we will gladly quote you the delivered price to your town. This service does not obligate you in any way. Don't hesitate to write Sears Personal Service Department on any of your problems, we'll gladly answer any questions you would like to ask about our merchandise, service or transportation.

Freight Is Economical

It's fast and dependable, too. All railroads charge as much for carrying less than 100 pounds as they do for a full 100-pound shipment. On shipments over 100 pounds charges are based on actual weight. And the freight rate you pay is exactly the same no matter who makes the shipment, as freight rates are regulated by the Interstate Commerce Commission and not by the shipper, or by the railroad. *The minimum charge for any freight shipment is the rate for 100 pounds but it is never less than 55c.*

Safe Delivery Guaranteed

If there is a freight agent at your station you pay freight charges when shipment is received. If there isn't a freight agent, include

additional money in your remittance to cover freight charges. If you send too much, we always return the difference.

In case of damage or shortage of any part of your order, have the freight agent make a notation to that effect on your freight bill when you receive the goods. If not discovered until unpacking shipment at home, request agent to call and make an inspection. Ask him to furnish you with a copy of his inspection report and send it together with the freight bill and a letter of explanation to us. If there is no freight agent, simply write us. We make good promptly any damage or shortage.

It's Easy to Figure Freight Charges

Articles usually shipped by freight take different rates because they are packed differently and the risks of damage or perishability differ. For that reason, the rate on bulky articles is different from the rate on compact articles. The tables below offer you a simple method of figuring freight charges.

How to Figure Freight Charges: If you are ordering merchandise to be shipped from Philadelphia, or Newark, N. J., first find in the table below the city in which you live or the city nearest you. Then find the rate per 100 pounds to that city for the merchandise in which you are interested, and it will be easy for you to figure the freight charges. For example: You live in or near Dover, Delaware, and order 150 sq. ft. of oak flooring weighing 150 lbs. The rate per 100 pounds on flooring from Newark to Dover, Delaware according to table below is 39c. Multiply the shipping weight 150 pounds ($1\frac{1}{2}$ times 100-pound rate) by 39c and your answer is 59c, the approximate total freight charge.

FREE ESTIMATE SERVICE

Our estimators will furnish to you the Freight Prepaid Total Prices delivered to your station, upon receipt of your itemized lumber and millwork list. They will also advise the kind of wood most suitable for your particular requirements.

HOW TO SEND MONEY

The safest ways to send money are by postoffice money order, express money order, bank draft or personal check. If in a special hurry your money and order may be sent by telegraph. Be sure to give your complete address.

Enclosed please find \$.

If this is a Cash Order check here →
If this is an EASY PAYMENT Order check here and fill in
the Information Blank on opposite side of this sheet.

If this is a Freight Prepaid Estimate check here

Please Ship as CheckedFreight ☐Prepaid Freight ☐Express ☐

For Freight Classifications and rates on Millwork see white sheet opposite inside back cover.

If there is no freight agent at your station you should send money to prepay freight charges.

IMPORTANT

In ordering framing dimension, state number of pieces wanted. In ordering flooring, sheathing, siding, ceiling, etc., state number of square feet wanted. In ordering moldings, casing base and finished lumber, state number of lineal feet (total length) wanted. In ordering doors, windows, sash and glass, give width first.

[illegible]

If you will tell us what this LUMBER is to be used for it would be a great help in filling your order

WE GUARANTEE TO SATISFY YOU

(OVER)

Why wait till you're 50?

USE F.H.A. FINANCING PLAN AND MODERNIZE NOW

SEARS LOW PRICES MAKE A LITTLE
MONEY GO EVER SO MUCH FARTHER

REPAINT
Beauty and protect your home. See Paint pages in this Catalog.

NO MONEY DOWN
NO ENDORSERS
LOW FINANCING COST
UP TO 36 MONTHS TO PAY

SEARS WILL ASSIST IN ARRANGING YOUR LOAN

Enjoy a modernized home while you're still young—no need to wait until you're 50 or more. The F.H.A. Financing Plan permits you to make improvements on terms that are the most liberal in history. Sears will assist you in obtaining this loan—and Sears quality modernizing materials will save you money and insure all-around satisfaction for years to come.

If your roof leaks; if your bathroom or plumbing is out of date; if your home is without insulation; if you want to put in a heating plant; if you wish to enlarge home or barn; or if you need improvements of any sort, the F.H.A. Plan is "made to order" for you. Remember! You may never again be able to modernize your property at such low prices and under such liberal terms. This plan expires June 30, 1939, therefore you must have your application in by June 15 at the latest.

BE SURE YOUR LOAN IS ELIGIBLE

To be eligible for an F.H.A. loan, you must be able to comply with the requirements below. First check up now to be sure that your job comes under this plan. The list below gives items which can be bought under the F.H.A. plan. The requirements are not in any sense strict; simply the usual conditions made by any reliable financing institution.

1. The materials must be used in an existing building—not one that is being built.
2. You must own the property on which the materials will be used.
3. Taxes and mortgage payments, if any, must be up to date.
4. Your income must be sufficient to meet the payments conveniently.
5. You must be of good credit standing.

6. Loans are made from \$100 to \$2,500.
7. Minimum monthly payment is \$5.00.
8. Maximum time for repayment is 36 months.
9. Your order must be for materials classed under the list below.
10. Loans for furniture, taxes, or improvements not actually a part of the property, are not eligible.

HERE'S ALL YOU HAVE TO DO

1. Make up a list of materials needed.
2. Order these materials in the regular way and send to us with a letter telling us you wish to pay for the order on the F.H.A. plan.
3. Advise us what amount you would like to pay each month, or how many months you would like the loan to run.

Upon receipt of this information, we will send you Credit Statement blank and note form. Fill these out and return to us. Send no money—first payment due one month after goods are shipped.

ORDERS OF LESS THAN \$100.00

or orders for merchandise otherwise not eligible for F.H.A. loan, may be purchased under our regular Easy Payment Plan as explained on Page 5. For example: If your bill for building materials or other merchandise does not amount to \$100, or if the merchandise you intend to buy is not in the list above, use the Sears Easy Payment Plan. Your Easy Payment order may be for as little as \$10.00 and it may include anything in our catalog. Remodel now; pay from regular income.

The following table indicates the total financing charge and monthly payments under F.H.A. plan.

Use F.H.A. for These Materials Only			For 12 Months			For 18 Months		
Builders' Hardware	Light Plants	Siding	Amount Required	Financing Charge	Monthly Payment	Financing Charge	Monthly Payment	
Electric Fixtures	Lumber	Stalls	\$130.00	\$ 6.83	\$11.41	\$ 9.99	\$ 7.78	
Fencing	Millwork	Stanchions	225.00	11.83	19.74	17.29	13.47	
Guttering	Paint	Tiling	400.00	21.05	35.09	30.76	23.94	
			For 24 Months			For 36 Months		
Heating Plants	Plumbing	Wallpaper	\$130.00	\$13.15	\$ 5.97	
Insulation	Roofing	Water Supply	225.00	22.76	10.33	\$33.68	\$ 7.19	
Lightning Rods	Sheathing	Wiring Material	400.00	40.48	18.36	59.51	12.77	

WRITE FOR A FREE ESTIMATE

It will cost you nothing to let our staff of experts plan your modernizing work and submit a price, including transportation charges, on all the materials you need for modernizing your home. It is quite possible that we can save you considerable money by eliminating special or "made to order" designs that contribute nothing in beauty or service but add only to your cost. This estimating service is free—take advantage of it. Further information below.

SEND FOR INFORMATION BLANK

If you are unable to determine from our catalog the exact cost of materials needed for your remodeling, send for any of the information blanks shown above. These contain measuring instructions and other useful information. Fill out blanks and return to us. Our Estimating Department will give you the exact cost of all modernizing material needed. The service is FREE. Ask for blanks by number: Water System 6558L; Roofing, Siding and Guttering 6089L; Heating 6095L; Wiring 6238L; Plumbing 8206L.

SO EASY

It's a pleasure
TO SHOP AT SEARS

Of course it's easy when you can do ALL your shopping leisurely . . . in comfort . . . in your own home. Our new catalog filled with top-quality merchandise brings a big, modern department store right to you, making the entire family's shopping a matter of filling out an order blank. And you'll get a real thrill when you see how our low prices will make your dollars stretch.

EVERY ITEM MUST PROVE ITS RIGHT TO A PLACE IN THIS CATALOG

Quietly working behind the scenes at Sears is the largest Merchandise Control Laboratory in the world. Here are skilled engineers, chemists, and technicians whose sole job is to see that highest standards of quality are met and maintained. Thousands upon thousands of items are tested, checked, compared each year. Only those that can prove their right to a place in Sears catalog are ever offered to you. Because we watch quality and value so closely, we are able to back every article we sell with the most sincere guarantee ever written.

We Guarantee • **To Save You Money** • **To Deliver All Merchandise Safely** • **To Satisfy You Perfectly**

WE GUARANTEE THAT EVERY ARTICLE IN THIS CATALOG IS HONESTLY DESCRIBED AND ILLUSTRATED.

WE GUARANTEE THAT ANY ARTICLE PURCHASED FROM US WILL GIVE YOU THE SERVICE YOU HAVE A RIGHT TO EXPECT.

IF FOR ANY REASON WHATEVER YOU ARE NOT SATISFIED WITH ANY ARTICLE PURCHASED FROM US, WE WANT YOU TO RETURN IT TO US AT OUR EXPENSE. WE WILL THEN EXCHANGE IT FOR EXACTLY WHAT YOU WANT, OR WILL RETURN YOUR MONEY, INCLUDING ANY TRANSPORTATION CHARGES YOU HAVE PAID.

SEARS, ROEBUCK AND CO.

THINGS YOU WILL WANT TO KNOW

ABOUT OUR EASY PAYMENT PLAN

Anything and everything in any Sears catalog can be purchased on Sears Easy Payment Plan. See page in front of book, for complete details. We will also help you to arrange an F.H.A. loan as explained in the Building Supply pages of the catalog.

ABOUT HOW TO SEND MONEY

The very best way to send money is by money order or check. If you live on a rural route, your mail carrier will be glad to buy a postoffice money order for you. It is better not to send coins, paper money or postage stamps, but should it be necessary, please be sure to send your order by registered mail.

ABOUT C.O.D. SHIPMENTS

If you are in a special hurry, send your order by paid telegram, giving full information, and it will be sent C.O.D. at once. The regular Postoffice charges are made for C.O.D. handling as explained on the Parcel Post page.

ABOUT CATALOG PRICES

Our large purchases protect you against any advance in prices. And if, during the life of this catalog, for any reason whatever, we can reduce the price of any merchandise in this book, your order will be filled at the new lower price. We'll return every penny of difference to you if you have ordered at the old higher price, even though you have no way of knowing that the price has been reduced. You always Save at Sears.

ABOUT OUR ONE-DAY SERVICE

The majority of orders received before noon each day are on their way to our customers the same day. We're mighty proud of our reputation for fast, dependable service. Where catalog descriptions show factory or warehouse shipping points, time must be allowed to transfer your order to the factory or warehouse for shipment of the merchandise to you.

ABOUT OUR MAIL ORDER HOUSES

Sears operate 10 big Mail Order Houses—in Chicago, Philadelphia, Boston, Minneapolis, Kansas City, Atlanta, Memphis, Dallas, Los Angeles, and Seattle. We'd enjoy a visit from you! Our door is always open and we sincerely invite you to come in. You're welcome at Sears.

ABOUT THIS SPECIAL CATALOG

It brings to you a wide selection of Sears highest quality, laboratory tested merchandise at lowest prices . . . backed by Sears famous guarantee of satisfaction or your money back. Because this book is made up mostly of pages taken from our big General Catalog you may find references to pages not included here.

The prices quoted on articles of merchandise in this book apply only to orders from this catalog when placed by mail, telephone, telegraph, or through the catalog order desk of any Sears Retail Store, Order Office or Agency.
